RE: FCC ID: BEJKE520

Applicant: LG Electronics Co., Ltd.

Correspondence Reference Number: BEJ7786
Confirmation Number: 709100786-88
Date of Original Email: September 13, 2007

Subject: Request for additional information

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

1. The block diagrams, schematics and operational description all refer to a WLAN within

the EUT, however, there is no test report for a WLAN. Is there a WLAN in the EUT? If so, is it enabled? Or, are the documents incorrect?

→ The documents are correct. Although the EUT supports WLAN function, WLAN in the EUT can't be used in the USA. Briefly explaining, the EUT just supports VoIP. Without Specific Carrier's AP, nobody can't use it.

Additionally, the Carrier doesn't operate and install AP in the USA. That's the why we didn't request WLAN certification.

I think this will help you understand regarding this issue.

2. Please submit a more detailed operational description (technical description) of the Bluetooth transmitter.

→ Please find out the BT operational description.

3. We note the following typo: p.20/63 of the SAR report, the measured system validation SAR level should be 37.72 (9.43 x 4).

→ Please find out the revised SAR test report.

The items indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Gregory Czumak
