Jacob, I have reviewed the above referenced application for the 19" LCD monitor and find that the following information is needed in order to complete the TCB application review:

The Users Manual that has been submitted does not contain the required information in accordance with FCC 15.21 (Modifications...) 15.27 (special accessories) and 15.105 (interference...). It appears as though the typical regulatory compliance section in your manuals is missing from the sample submitted (attached for your reference). Please add the required Users manual statements as indicated above and re-submit the Users Manual.

Please contact me if there are any questions.

Best regards,

Chris Harvey
