

Technical Justification letter for SAR Evaluation

September 28, 2012

FCCID: BEJLDS401

IC Number: 2703H- LDS401

The SAR evaluation is not required when the average power is less than $60/f(\text{GHz})$.

The Max. peak power is **9.29 dBm**.

Calculation = $60 / 2.480\text{GHz} = 24.19\text{mW} = \mathbf{\underline{13.84\text{dBm}}}$

According to above comparing, the SAR evaluation is not required.
