Congratulations on your purchase of the LSP-350 Fixed Wireless Phone. This phone has been designed to operate on the latest digital mobile communications technology. It has greatly enhanced voice clarity and provides various advanced features.

This phone provides:

- CMX 16 Poly Ringer Type, Power on/off, SMS, Alarm, Midi Sound, Wide view graphic LCD Display, A choice of 15 Melody or 5 Bell Ring sounds
- A MENU driven interface with prompts for easy operation
- 3 Way calling
- Call history management
- Last call Number Redial
- Speed Dialing with a 99-number memory
- Powerful Phonebook
- Enhanced SMS feature
- Dial tone
- ROH (Receiver Off-Hook) tone
- Adjustable Ringer Volume, Key button volume, Speaker & Handset volume
- Internal Back-up Battery Pack
- AC Power Supply
- Dipole Antenna
- RS-232C/USB Port for service or repair
- Hands free speaker phone
- Organizer
- My MENU
- Game
1. Important Information

1.1 Safety Information

**Warning**

To reduce the risk of fire or electric shock, do not expose this unit to rain or moisture. Do not use this unit in swimming pools or other water bodies.

**IMPORTANT**

Before installing or operating the unit, please read this information.

1.2 Optimal Phone Performance

- Do not hold the antenna when operating the unit, or operate the unit when someone is within four inches (ten centimeters) of the antenna. Both cases affect the call quality and may cause the telephone to operate at a higher power level than required.
- For the best call quality, keep the antenna free from obstructions and position the antenna upright.
- Do not use the unit if the antenna is damaged. Replace the damaged antenna immediately by a qualified technician. Use only a manufacturer-approved antenna. Non approved antennas, modifications, or attachments may impair call quality and damage the unit.
- RF energy may affect improperly installed or inadequately shielded personal medical devices such as pace-makers or hospital monitors. Consult the manufacturer of any personal medical devices to determine whether they are adequately shielded from external RF energy. Turn your unit OFF in health care centers if any regulations posted in the area instruct you to do so. Hospitals or health care centers may be using equipment that may be sensitive to external RF energy.
- If this unit causes harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
Reorient or relocate the receiving antenna

Place the radio or television farther away from the unit.

Connect the equipment to an outlet on a circuit different from that to which the unit is presently connected.

Consult the Authorized LGE Dealer for assistance of an experienced radio/TV technician.

Use only battery, antenna and AC power supply provided by LGE. Using any other maker may invalidate the warranty.

Only authorized personnel should service the unit and its accessories. Faulty installation or service can be dangerous and may invalidate the warranty.

Do not use the unit in any designated "no cellular phone use" area.

Avoid using the unit in high temperature or humidity.

Avoid spilling any liquid on the unit. If the unit gets wet, turn the power off immediately and remove the backup battery and AC power supply. If the unit doesn't work, please return it to the service agent.

Avoid shock or impact.

We recommend you to charge the backup battery before initial use. The backup battery may be discharged during delivery.

1.3 Care and Service

Before cleaning, always unplug the unit from the wall outlet and remove the antenna (or disconnect the antenna cable). Do not use liquid or aerosol cleaners; use a damp cloth for cleaning.

If the unit doesn't work, do not attempt to disassemble it; contact the telephone service agent for assistance.

If any of the following conditions exist, unplug the unit from the wall plug, remove the battery and call the service agent.

The power supply cord is damaged or frayed.

Liquid has spilled into the unit.

The unit has been exposed to rain or water.

The unit has been dropped or damaged.

The unit does not function normally even after following the operating instructions.
1.4 Safety Information

Do not use the unit with a car battery. It may cause electric shock, fire, breakdown or transformation.

For safety, use only an adapter approved by LG. LG does not bear responsibility for any faults that may arise due to non-conformation to this guide.

Example: LSP-350 (LG Power Adapter Source: DC 5V / 1A)

Avoid using the unit in high temperature or humidity. Avoid spilling any liquid on this unit. If the unit gets wet, turn the power off immediately and remove the backup battery and AC power supply.

Keep the unit dry. Submersion, humidity, and liquids contain minerals that may corrode internal electronic circuits.

Do not store or use the unit in dusty or dirty areas as this can damage the moving parts.

Do not store the unit in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.

Do not store the unit in cold areas. When the unit warms up to its normal operating temperature, moisture can form inside the unit, which can damage the internal electronic circuit boards.

Do not attempt to open it. Non-expert handling of the device could damage it. It may cause fire, electric shock and breakdown. Consult your authorized LG dealer for assistance.

Do not drop, knock or shake the unit. Rough handling may break the internal circuit boards.
Do not use harsh chemicals, cleaning solvents or strong detergents to clean the unit. Wipe it with a soft cloth that has been slightly dampened in a mild soap and water solution.

Do not paint the unit. Paint can clog the device's moving parts and prevent proper functioning.

During lightning, do not touch the power plug or the phone line. It may result in an electric shock or death.

Do not install the unit under direct sunlight or on an uneven surface.

Before using the plug, check the available power voltage. Inaccurate power voltage may cause fire and damage. Example: LSP-350 Input Voltage: 100-250V.

Do not plug many power cords into one outlet. It may cause fire or electric shock.

Do not remodel the power cord or disassemble it. If the power cord or plug is impaired, do not use it. It may cause fire or electric shock.

Do not install the unit in an ill-ventilated place. It may cause fire or a breakdown.
Do not touch the plug with wet hands. When disconnecting the power cord of any accessory, grasp and pull out the plug itself and not the cord. It may cause fire or electric shock.

Do not put heavy objects on the power cord. Do not bend the power cord too much. It may cause fire or electric shock.

Do not, in any way, cause a short-circuit. It may start a fire or the unit may explode causing injury.

Do not create a sudden impact on the battery by throwing it. Do not dispose of batteries by putting them in a fire. They may explode or catch fire due to the electrolyte within.

Use only an LG-approved battery or adapter. If not, it may cause an explosion or result in a short-circuit. LG does not bear any responsibility for the damage.

When you disconnect the power cord of any accessory, grasp and pull the plug itself and not the cord. It may cause the adapter to breakdown.
1.5 FCC RF Exposure Information

WARNING! Read this information before operating the phone.
In August 1996, the Federal Communications (FCC) of the United States, with its action in Report and Order FCC 96-326, adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards. To comply with FCC RF exposure requirements, a minimum separation distance of 2.5cm (0.98 inch) must be maintained between the user/bystander and the back of the unit, including the antenna.

CAUTION
Use only the supplied and approved antenna. Use of unauthorized antennas or modifications could impair call quality, damage the phone, void your warranty and/or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with skin, a minor burn may result. Contact your local dealer for a replacement of antenna.

FCC Part 15 Class B Compliance
This device and its accessories comply with part 15 of FCC rules. Operation is subject to the following two conditions: (1) This device and its accessories may not cause harmful interference, and (2) this device and its accessories must accept any interference received, including interference that may cause undesired operation.
2. Introduction

2.1 Front View of the Telephone

- Soft key 1 : Activates MENU state
- Dial/Flash : Activates Dial or Flash state
- End/PWR : Deactivates a state – End or Power ON/OFF
- Soft key 2 : Searches phone number list
- ‹ ( ) : Moves to Profile MENU(Volume/Condition), Moves right in the MENU
- ▲ ( ) : Moves to SMS MENU, Moves up in the MENU

2.3 Installation

You should follow each step carefully as shown below in order to guarantee the proper operation of CDMA Fixed Wireless Phone.

STEP I. Check Components

The following components are supplied for Fixed Wireless Phone.

1. LSP-350 Main Unit with Handset (Including inner backup battery) -1EA-
2. Dipole Antenna -1EA-
3. AC/DC Power Adapter -1EA-
4. User Guide -1EA-

Please make sure that these components are present before you begin to install the unit. If any of the components are missed or damaged, contact the store where you purchased the phone immediately.

STEP II. Place the Terminal

Place the unit on the stable flat surface area (desk, table, etc.). Serious damage may result if the unit is dropped. Do not place the unit within 1 meter of heaters or radiators. This unit is designed for desktop usage. Avoid the direct exposure to sunlight and dampness.

Read the SAFETY INFORMATION located in the first part of this document before you place the unit.

STEP III. Connect Components (See the figures in “Installation Steps”.)

Connect the antenna to the TNC antenna connector located at the top of the unit. If you have placed the unit on a flat surface, position the antenna upright.

Connect the curl cord of the handset to the RJ-11 port located on the left side of the unit.
Connect the AC/DC Adapter cable to the DC input port located at the top of the unit.

If it is correct, a beep tone will be heard.

If it is not correct (Booting fails or beep tone is not heard), you will have to reconnect the adapter or backup battery.

Please observe the following to get better voice quality

1. Keep away from electrical appliances such as TV, computer, radio etc.
2. Keep the unit in a high and central location without any obstructions.
3. Raise the integral antenna of the unit to get maximum strength as shown in the figure.

STEP IV. Check the LCD Display

After you follow the installation instruction step I to step III, please check the LCD for normal operation.

If you do not see the status of service, please repeat the 5th instruction of step III.

Then confirm the status of phone to get the proper signal strength from the service operator system.

The adapter type(with power cord) may differ from each country.
2.4 Installation Steps

Please follow the procedure below to install the unit properly.

1. Connect base-handset to the handset connector.

2. Connect the antenna to the TNC connector (Turn right).

3. Turn the antenna upright.

4. When you first use the unit, please Turn “on” the battery switch.

5. Connect the AC power supply.

Notice

Before using the unit, please check that the battery switch is “on”.

After switching it on, use the phone.

When charging the battery, check that the battery switch is “on”.

The battery will be charged only when the battery switch is “on”.
3. Basic Operation

3.1 Making a Call

You can make a call as follows.

1. Pick up the handset or press \[\text{button}\].
2. Listen for dial tone.
3. Enter the phone number with area code if needed.
5. The call is connected and you may start conversation.
6. To disconnect the call, replace the handset or press \[\text{button}\].

When the user presses the 'Dial/Flash' button after dialing any desired number, if the user pick up the handset or press the speaker phone button, the phone makes a call immediately.

3.2 3 way call

You can start tripartite conversation.

1. Enter the phone number while talking over the phone.
2. Press Dial/Flash button.

* This service should be registerd by Telecom Service Company.

3.3 Call waiting

While a call is in progress, you may hear two beeps indicating another incoming call. When call waiting is enabled, you may put the active call on hold while you answer the other incoming call.

1. Press Clear or End button, Call Waiting window is gone. Or
2. Press Dial/Flash button, you may start conversation with called number.
3. Re-press Dial/Flash button, you may start conversation with previous number.

3.4 Volume Control

1. Press \[\text{left/right button}\] of navigation while in a call, adjust receiver volume.
2. Press \[\text{up/down button}\] of navigation while in a call, adjust MIC volume.
3.5 Receiving a Call

When the bell rings or backlight blinks in silent mode, you can receive a call as follows:

1. Pick up the handset or press the speaker phone button.
2. Start a conversation.
3. To disconnect the call, replace the handset or press the speaker phone button.

3.6 Lock Mode

Keeps your phone from unauthorized use. Once the phone is locked, it is in restricted mode, until the lock code is entered. This will allow you to receive phone calls and still make emergency calls.

The lock code/password on your phone is 0000 by default. If you need to modify the lock code, you may modify it using the new lock code within the security set MENU.

Lock Mode

1. Press ‘0’ button for a long time.

Unlock Mode

2. Press Unlock button.
3. Input Lock Number.
4. List of Menu State

### 4.7.7 World Clock

It is useful if you need to make a call to another country, and you are not sure about the time difference.

1. Press **MENU + 7(Organiser) + 7(World Clock)** in on-hook state.

2. Select the city by navigation button

### 4.7.8 Help

1. Press **MENU + 7(Organiser) + 8(Help)** in on-hook state.
4.8 Joy Box

1. Press MENU + 8(Joy Box) in on-hook state.
2. Select JumpJump or StoneAxe.

To return to the initial screen, press END button.
And to return to the previous screen, press Clear button.
5. Speaker Phone

This function is a convenient feature, which enables you to make a call using the speakerphone button in on-hook state.
6. General Information

6.1 Main Unit

<table>
<thead>
<tr>
<th>Item</th>
<th>LSP-350</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tx Frequency</td>
<td>Digital : 824 ~ 849 MHz</td>
</tr>
<tr>
<td>Rx Frequency</td>
<td>Digital : 869 ~ 894 MHz</td>
</tr>
<tr>
<td>Channel Bandwidth</td>
<td>1.25 MHz</td>
</tr>
<tr>
<td>Tx Power</td>
<td>Digital : LOWER: 0.2W ~ UPPER: 1W</td>
</tr>
<tr>
<td>Rx Sensitivity</td>
<td>-104 ~ -25dBm</td>
</tr>
<tr>
<td>Size (mm)</td>
<td>220 × 190 × 78 (L X W X H)</td>
</tr>
<tr>
<td>Weight (g)</td>
<td>Below 650 (included Li-ion battery)</td>
</tr>
<tr>
<td>Operating Temperature</td>
<td>-10 ~ 55°C</td>
</tr>
</tbody>
</table>

6.2 AC/DC Adapter

<table>
<thead>
<tr>
<th>Item</th>
<th>SMPS Type Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Input Voltage</td>
<td>AC 100 ~ 250V</td>
</tr>
<tr>
<td>Input Frequency</td>
<td>50 / 60Hz</td>
</tr>
<tr>
<td>Output Voltage</td>
<td>5V(DC), 1A</td>
</tr>
</tbody>
</table>

6.3 Battery

<table>
