

1. The operational description lists cellular and AWS WCDMA capability. Please confirm that these are not implemented in the EUT.
→ This EUT doesn't support AWS WCDMA capability.

2. Page 5 of the user's manual references cellular WCDMA operation- please remove this reference and resubmit the manual.
→ Please find the attachment.

3. Page 3 of the Part 15B test report lists (in 2 places) an incorrect transmit frequency range for WCDMA operation- please revise and resubmit.

==> Please find the revised test report on page 3.

4. Page 4 of the Part 15B report lists the HP notebook pc as the EUT- please revise and resubmit.

==> Please double-check the test report. It is not the EUT. HP notebook is just connected to the EUT.

5. MPR does not appear to be implemented according to 3GPP for HSUPA Subtest 1 and 5. Please address.

→ Please find the attachment.(WP007 MPR calculation.)

We got the WP007 from chipset company. Please check it out.
