Subject: RE: Question Regarding FCC ID: BEJME830D

Dear Mr. Kim,

Thank you for your response to our questions regarding the referenced application. With respect to your response to question #4- while you may have measured both 850 GSM and 850 EDGE, only one set of occupied bandwidth plots were submitted. In other words, the exact same plots were submitted for both 850 GSM and 850 EDGE. Please submit 2 sets of plots- one for 850 GSM and a different set for 850 EDGE.

Please contact me with any questions. Thank you.

Sincerely,

Gregory Czumak

Subject: Request for additional information

2/8/2007

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

1. Please submit a statement from the applicant verifying that the FCC ID Label will be visible at the time of purchase. → Please found out the revised label.
2. Please submit EMC and SAR Test Set-up Photos.
→ Please see the attached it.
3. The Tune- Up Procedure states that GSM850 is not available. Please correct.
→ Please found out the revised tune up procedure.
4. Identical occupied bandwidth plots were submitted for both GSM850 and GSM850 EDGE. Please submit the appropriate occupied bandwidth plots for both modulation formats.
→ We measured the device via wireless communication set (E5515C).
In the EDGE mode case, we measured it with Active Cell(EGPRS) and 8PSK mode.
That is, actually we measured it with GSM(GMSK)/EDGE(8PSK).
5. FYI: the FCC ID label submitted has an incorrect statement on it. Due to the small size of the EUT, and since the statement required by Section 15.19 is already in the manual, there is no need to place any statement on the label.
→ Please found out the revised label.

The items indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,
