Subject: RE: For the new project of LG (BEJMG810)

Hello Dennis,

Thank you for your comments.

Please refer to the below answer for your comments.

1. I understood for your saying.

Because the device has BT function, we tested it under BT function enable mostly.

And we tested it under BT function disable again in the worst case.

That is, we tested it on the contrary for your comment.

And GPRS mode is also tested under communicating with E5515C.

Anyway, we tested it for all modes. For the future, we will test the EUT according to your comment.

The BT function enable means that it is connected with BT headset.

2. I uploaded the revised part 22&24 test report on ATCB web.

If you have any question, let me know.

And if it has no problem, please progress the grant issuing of it ASAP.

Thanks.

SUNG RYUL KIM
