

Technical Justification letter for SAR Evaluation

October 19, 2012

FCCID: BEJRCB100

The SAR evaluation is not required when the average power is less than 60/f(GHz).

The Max. peak power is **-1.53 dBm**.

Calculation = $60 / 2.480\text{GHz} = 24.19\text{mW} = \mathbf{13.84\text{dBm}}$

According to above comparing, the SAR evaluation is not required.
