

American Telecommunications Certification Body Inc.
6731 Whittier Ave, McLean, VA 22101

June 28, 2006

RE: LG Electronics Inc.

FCC ID: BEJRD2750

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) The Label seems to be missing the required 15.19(a)(1) statement. Please review.
- 2.) The Tune-Up procedure appears to permit maximum conducted powers up to +26dBm. This is much greater than the conducted RF powers listed in the Test Report and SAR Report. Please review.
- 3.) Please note the Commission insists that all equipment associated with SAR testing be calibrated on a yearly cycle. I note the validation dipoles were last calibrated February 2005. Please review and comment.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
