RE: LG Electronics

FCC ID: BEJRD6330

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) The manual on page 10 appears to indicate that this device is capable of analog AMPS-FM within the 824 - 829 MHz band. If so, then AMPS data should also be presented in addition to CDMA. Please review.
- 2.) Radiated power for Part 22 should be reported in terms of ERP and not EIRP. Please review.
- 3.) Is this device capable of being attached to a computer? If so then this device may be viewed as a Computer Peripheral and must be either Certified or DoFC in addition to the requirements for Part 22 Licensed services.
- 4.) Test results in Section 7.3 of the Test Report indicate GSM and not CDMA. Please correct. Was this test performed to the 10th harmonic?
- 5.) Kindly provide actual label artwork for this device as it is intended to be sold.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
