
Wireless Notices

In some situations or environments, the use of wireless devices may be restricted by the proprietor of the building or responsible representatives of the organization. Such restrictions may apply when:

- Using the wireless equipment on airplanes, or
- The risk of interference to other devices or services is perceived as harmful.

If you are uncertain of the policy that applies on the use of wireless equipment in a specific organization or environment (such as airports), you are encouraged to ask for authorization to use this device prior to turning on the equipment.

FCC RF EXPOSURE INFORMATION

Low power, Radio transmitting type devices (radio frequency wireless communication devices), may be present in your notebook system. This device may operate in the 2.4GHz band. The following section is a general overview of considerations while operating a wireless device.

Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could result in violation of FCC regulations.

Next-to-Body Operation

This device was tested for RF Exposure typical next-to-body (i.e. in the lap) operations with the device directly contacted to the human body. The power output of the wireless device or devices that may be embedded in your notebook is well below the RF exposure limits as known at this time. Because the wireless devices (which may be embedded into your notebook) emit less energy than is allowed in radio frequency safety standards and recommendations, LG Electronics believes these devices are safe for use. Regardless of the power levels, care should be taken to minimize human contact during normal operation.
