Subject: Submitting Class II Permissive Change for Cellular Telephone Transceiver

FCC ID: BGBMT253XF0R6A

Gentlemen:

We wish to file Class II Permissive Change in accordance with 47CFR2.1043(b)(2) for the subject cellular telephone transceiver.

This change is being applied due to the following modifications:

1. A different antenna is used.
2. The baseband processor chip and the DSP chip have been combined into one chip.
3. Other components were changed to lower the cost of the particular parts. The parts were chosen to meet the original MT253 specifications. No RF characteristics or specifications have changed. Please refer to the following file uploaded at the same time as this letter for a list of the changed components: CHANGES ON TABLE 2.DOC.

CONFIDENTIALITY REQUEST:

Pursuant to 47CFR0.459 of the Commission's rules, we request that all information contained in the following exhibits be withheld from public disclosure. This material is **CONFIDENTIAL** information, and contains trade secrets and details that would not be typically available to the public.
