

## 5. Measurement Data For Transmitter {2.983(e)}

The following table shows the attached measurement data of the Transceiver Unit and the measurement methods employed.

Table 5.1 Measurement Data List

| Sect. No.   | Item                                      | Result           | Method   |
|-------------|-------------------------------------------|------------------|----------|
| 2.985(a)    | 1. Radio Frequency Power Output           | Tables 1,2 and 3 | 6.1.1    |
| 2.989(c)(1) | 2. Occupied Bandwidth                     | Attached Report  | 6.1.5    |
| 2.991       | 3. Spurious Emissions at Antenna Terminal | Attached Report  | 6.1.6(1) |
| 2.993       | 4. Field Strength of Spurious Radiation   | Attached Report  | 6.1.6(2) |
|             | 5. SAR                                    | Attached Report  |          |

Note: Unless otherwise indicated, the measurements were made under the standard supply voltage (i.e 5.0V), and the standard ambient temperature (i.e 25 deg C).
