Before Using the Printer

Before Using the Printer

Important Safety Information

The symbols shown below are used in this manual in order to ensure safety and proper use of this product and to prevent danger to you and other persons, and property damage.

The symbols are identified by their level of importance, as defined below. Be sure that you completely understand their meanings before reading this manual.

**WARNING:**

Warnings must be followed carefully to avoid serious bodily injury.

**CAUTION:**

Cautions must be observed to avoid minor injury to yourself, damage to your equipment, or loss of data.

Note:

Notes have important information and useful tips on the operation of your equipment.

Safety Precautions

Before using this product, please read the Important Safety Information included with the product.

Caution labels

The caution labels on the product indicate the following precautions.

**CAUTION:**

Do not touch the thermal head and its surroundings during use or immediately after use. They may be hot immediately after printing.

**CAUTION:**

Touching the manual cutter may cause injury.

Before Using the Printer

Manuals for This Product

The following manuals are available for this product.

<p>Paper manual</p> 	<p>Manuals, such as Setup Guide, included in the product package</p> <p>Explains how to install and set up this product, from checking the bundled items. Precautions for handling this product are also provided. Before Using the Printer

Checking Items Included with the Printer

The following items are included with the printer. If any item is damaged or missing, contact qualified service personnel.

☐ Printer

* The printer is equipped with a belt clip.

Before Using the Printer

☐ Battery (OT-BY20)

Battery (OT-BY80II)

Battery (OT-BY80II)

☐ USB cable (Type-c to Type-C)

☐ Roll paper for operation check

	Power button	This button turns the printer on or off.
	Feed button	Press this button once to feed the roll paper for one line. Hold down this button to continue feeding the roll paper.
	Power LED	This turns on when the printer is on.
	Error LED	Turns on when the printer is temporarily unable to print, such as when no roll paper is loaded or the roll paper cover is open. Flashes when an error occurs.
	Charge LED	Indicates whether the battery is charging or not.
	Battery LED	Indicates remaining battery charge.
	Wi-Fi LED	Turns on when the printer is connected to Wi-Fi.
	Bluetooth LED	Turns on when the printer is connected via Bluetooth.

Basic Operations

Basic Operations

Placing or Hanging the Printer

The printer can be placed on a horizontal surface such as a desk or hung vertically from your belt using the belt clip of the printer.

- ☐ Placing the Printer on a Flat Surface

Basic Operations

Basic Operations

❑ Hanging the Printer

Basic Operations

Basic Operations

Placing the Printer on a Flat Surface

When using the printer on a flat surface, it is recommended to remove the belt clip from the printer.

Remove the belt clip as shown below.

Basic Operations

Hanging the Printer

By attaching the belt clip to your belt, you can hang the printer from your waist.

Hang the printer vertically with its operation panel facing up.

**CAUTION:**

- ❑ Before use, make sure that the belt clip is securely fastened to the printer and that it is not loose. Looseness may cause the printer to drop, resulting in injury or accident.
- ❑ Be careful not to drop the printer when hanging it with the belt clip.

Basic Operations

Basic Operations

Installing the Battery

The printer does not work without the battery installed.

**WARNING:**

Always use a OT-BY20 battery.

Use of batteries other than OT-BY20 may result in fire, explosion, leakage, overheating, or other damage.

Always use a OT-BY80II battery.

Use of batteries other than OT-BY80II may result in fire, explosion, leakage, overheating, or other damage.

Always use a OT-BY80II battery.

Use of batteries other than OT-BY80II may result in fire, explosion, leakage, overheating, or other damage.

**CAUTION:**

☐ Be sure to turn off the printer before removing the battery.

☐ Dispose of used batteries according to your local instructions.

Basic Operations

How to Install the Battery

Insert the battery so that its tabs engage with the grooves on the printer, and fit it in until it clicks into place.

Note:

See "How to Charge the Battery" on page 21 for instructions on how to charge the battery.

Basic Operations

How to Remove the Battery

- 1 Turn off the printer.
- 2 While pushing the battery hook, raise the battery and remove it.

Basic Operations

How to Charge the Battery

CAUTION:

- ❑ When charging the battery, install the battery to the printer.
- ❑ Charge the battery in an environment of approximately 0 to 40 °C (32 to 104 °F).

Note:

- ❑ When the printer is used for the first time, the battery needs to be charged for approximately 3 hours.
- ❑ When the printer is used for the first time, the battery needs to be charged for approximately 2.5 hours.
- ❑ When the printer is used for the first time, the battery needs to be charged for approximately 2.5 hours.
- ❑ Use a USB power adapter or USB port that complies with the USB standard.
- ❑ Only USB Type-C standard power mode is supported. The charging time varies depending on the power supply capability and settings of the USB power adapter and port.

 "USB charging" on page 52

1

Connect the included USB cable to the printer.

2

Connect the USB cable to a commercially available USB power adapter or computer.

3

The charge LED lights up when charging starts.

If the remaining battery charge is almost full, charging will not start.
Check the battery LED for remaining battery charge.

 "Battery LED" on page 23

4

The charge LED turns off when charging is complete.

Basic Operations

- 5 Disconnect the USB cable from the printer.

Basic Operations

Charge LED

	The battery is charging
	Battery charge error
	Battery is fully charged or not being charged

Battery LED

Indicates remaining battery charge.

The battery LED will not light unless you turn on the printer.

 ["Turning the Power On" on page 25](#)

Battery LED	Approximate battery level
	60 to 100%
	20 to 60%
	10 to 20%
	10% or less
	0% (printing not available)

Basic Operations

Wireless Charging

The battery can be charged using a commercially available wireless charger that supports the Qi standard.

Place the printer so that the  symbol on the printer overlaps the position indicated in the wireless charger manual.

The charge LED lights up when charging starts. If the charge LED does not light up, reposition the printer in the correct position.

Check the battery LED for charge level.

 "Battery LED" on page 23

Precautions for Wireless Charging

- ☐ For the procedure of wireless charging, refer to the manual of the wireless charger.
- ☐ Remove the belt clip when charging wirelessly.
-  "Placing the Printer on a Flat Surface" on page 15
- ☐ When charging wirelessly, remove the optional belt strap, shoulder strap, and soft case.
- ☐ When charging, be sure to correctly align the printer's wireless charging position with that of the wireless charger.
- ☐ Be careful not to allow foreign objects to get between the printer and the wireless charger. Foreign objects may generate heat or cause damages, resulting in improper charging.
- ☐ Disconnect the USB cable when charging wirelessly. Wireless charging will not work if the printer is connected to a computer or other device.
- ☐ The charging time with wireless charging is as follows.
3 to 6 hours (depending on the specifications of your wireless charger)

Basic Operations

Turning the Power On/Off

Turning the Power On

Hold down the  power button for about one second, and then release it. The  power LED lights up and the printer is turned on.

Basic Operations

Turning the Power Off

Hold down the  power button for about two seconds, and then release it. The  power LED goes off and the printer is turned off.

Basic Operations

Opening/Closing the Roll Paper Cover

CAUTION:

Be careful not to touch the manual cutter when opening or closing the roll paper cover. The manual cutter may injure your hand.

CAUTION:

Be careful not to touch the manual cutter when opening or closing the roll paper cover. The manual cutter may injure your hand.

How to Open the Roll Paper Cover

Press the cover open lever to open the roll paper cover.

Basic Operations

 **CAUTION:**
Be careful not to touch the protrusions on the roll paper cover. Your hands or clothes may be contaminated with oil.

Basic Operations

How to Close the Roll Paper Cover

Press both sides of the roll paper cover and close it tightly until it clicks into place.

Basic Operations

Installing or Replacing the Roll Paper

Follow the steps below to install or replace the roll paper.

CAUTION:

- ☐ *Be careful not to touch the manual cutter when installing or removing the roll paper. The manual cutter may injure your hand.*
- ☐ *Be careful not to touch the manual cutter when installing or removing the roll paper. The manual cutter may injure your hand.*
- ☐ *Make sure you use a specified roll paper type.*
- ☐ *Before installing the roll paper, take up any slack in the roll paper by pulling its leading edge. If you install a slack roll paper, a paper jam or print quality problems may occur.*
- ☐ *Before installing the roll paper, make sure that the roll paper is not deformed. Using a deformed roll paper will cause the printer to malfunction.*

1

Open the roll paper cover.

"How to Open the Roll Paper Cover" on page 27

2

Remove the used roll paper core if any.

3

Install the roll paper in the correct direction.

Basic Operations

- 4 Pull out some paper, and close the roll paper cover.

 "How to Close the Roll Paper Cover" on page 29

- 5 Cut out the roll paper that you pulled out.

- 1 Open the roll paper cover.

 "How to Open the Roll Paper Cover" on page 27

- 2 Remove the used roll paper core if any.

- 3 Install the roll paper in the correct direction.

- 4 Pull out some paper, and close the roll paper cover.

Basic Operations

 "How to Close the Roll Paper Cover" on page 29

5 Cut out the roll paper that you pulled out.

1 Turn on the printer.

2 Open the roll paper cover.

 "How to Open the Roll Paper Cover" on page 27

3 Remove the used roll paper core if any.

4 Install the roll paper in the correct direction.

5 Pull out some paper, and close the roll paper cover.

Basic Operations

If the printer is turned on, the roll paper is automatically cut.

Basic Operations

Anti-Curl Function

The printer is equipped with the anti-curl function. The function reduces the curl of the roll paper after printing.

Disabling the anti-curl function speeds up printing.

How to Disable the Anti-Curl Function

- 1 Open the roll paper cover.
 "How to Open the Roll Paper Cover" on page 27
- 2 Remove the roll paper in use, if any.
- 3 Remove the part for the anti-curl function as shown below.

- 4 Install the roll paper and close the roll paper cover.
 "Installing or Replacing the Roll Paper" on page 30

Note:

To activate the anti-curl function, install the part for the anti-curl function again.

Setup

Setup

~~This printer can be connected to a smart device via Wi-Fi or Bluetooth, or to a computer via USB cable.~~

~~❑ Wi-Fi model: The printer can be connected via Wi-Fi or with a USB cable~~

~~❑ Bluetooth model: The printer can be connected via Bluetooth or with a USB cable~~

Connecting via Wi-Fi (Wi-Fi model)

In order to connect the printer to Wi-Fi, it is necessary to understand the specifications of your network environment. Please check with your network administrator regarding the network environment.

Please see the video for general Wi-Fi connection instructions.

<https://www.epson-biz.com/?prd=tm-p202&inf=wireless>

<https://www.epson-biz.com/?prd=tm-p802&inf=wireless>

<https://www.epson-biz.com/?prd=tm-p802ac&inf=wireless>

Setup**Connecting via Bluetooth (Bluetooth model)**

Use the Bluetooth pairing function of the device you are using to establish a connection with the printer.

Please see the video for general Bluetooth connection instructions.

<https://www.epson-biz.com/?prd=tm-p202&inf=wireless>

<https://www.epson-biz.com/?prd=tm-p802&inf=wireless>

<https://www.epson-biz.com/?prd=tm-p802ac&inf=wireless>

Setup

Connecting to the computer(Head A)

Connecting with a USB Cable Head B

Connect the printer to the computer with the included USB cable or a commercially available USB cable.

- 1 Turn off the printer.
- 2 Connects the USB cable to the printer.
- 3 Connect the USB cable to the computer.

Cleaning

Cleaning

Cleaning the Printer Case

If the exterior surface is noticeably dirty, follow the steps below to clean it.

**CAUTION:**

Never clean the product with alcohol, benzine, thinner, or other such solvents. Doing so may damage or break the parts made of plastic and rubber.

- 1 Turn off the printer.
- 2 Disconnect the USB cable, if it is connected.
- 3 Wipe off the dirt with a dry or slightly damp cloth.

Cleaning

Cleaning the Thermal Head

Epson recommends cleaning the thermal head to maintain receipt print quality. We recommend cleaning periodically (about once every 3 months).

**CAUTION:**

- ❑ *After printing, the thermal head and its surroundings can be very hot. Be careful not to touch it and to let it cool before you clean it.*
- ❑ *Do not damage the thermal head by touching it with your fingers or any hard object.*

- 1
- 2
- 3
- 4

Turn off the printer.

Disconnect the USB cable, if it is connected.

Open the roll paper cover and then remove roll paper.

Clean the thermal head with a cotton swab moistened with alcohol solvent (ethanol or isopropyl alcohol).

Cleaning

5

When the cleaned area is completely dry, load the roll paper and close the roll paper cover.

Cleaning

Cleaning the Platen Roller and Paper Detector

Depending on the roll paper used, paper dust may stick to the platen roller and the paper may not be fed correctly. Follow the procedure below to remove the paper dust.

To maintain receipt print quality, we recommend cleaning the platen roller and the paper detector periodically (about once every 3 months).

- 1 Turn off the printer.
- 2 Disconnect the USB cable, if it is connected.
- 3 Open the roll paper cover and then remove roll paper.
- 4 Use a cotton swab lightly moistened with water to remove paper dust from the platen roller and paper detector.

Cleaning

A: Platen roller

B: Paper detector

5

When the cleaned area is completely dry, load the roll paper and close the roll paper cover.

Troubleshooting

Troubleshooting

QR Code Label

By scanning the QR code on the label attached to the inner side of the roll paper cover, you can access the user's manual.

If you encounter any problems while using the printer, you can use this QR code to quickly check for troubleshooting.

Troubleshooting

Meanings of LED Indications

The LED lights on the operation panel indicate printer status and communication status. If an error or trouble occurs, check to see which LED light stays on or off, or is flashing.

Printer status

 : Ignore the LED lights shown with this icon in the table.

Operation panel	Printer status and troubleshooting
	
	Normal status. The printer is ready to print. If the printer does not print, check the Wi-Fi LED or Bluetooth LED.
	The roll paper cover is open. Check whether the roll paper cover is tightly closed.
	The roll paper is not detected correctly. Check that there is enough paper left in the roll and that the roll paper is loaded correctly.
	Temperature of the thermal head is high. Due to the high temperature, the printer stopped printing. Printing starts again automatically when the thermal head temperature falls.
	The roll paper cover opened during printing. Check whether the roll paper cover is tightly closed.
	Immediately turn off the printer, wait for 10 seconds, and then turn it on again. If the Error LED turns on again even after turning the power back on, a malfunction may have occurred. Contact your qualified service personnel.
	

Wi-Fi Connection Status (Wi-Fi model)

	The printer is not connected to the Wi-Fi network.
	The printer is connected to Wi-Fi.
	The communication is temporarily unavailable such as when the IP address cannot be obtained.

Bluetooth Connection Status (Bluetooth model)

	The printer is not connected via Bluetooth.
---	---

Troubleshooting

	The printer is connected via Bluetooth.
	The printer is waiting to be paired with another device.

Charge LED

	The battery is charging
	Battery charge error
	Battery is fully charged or not being charged

Battery Level

Three LEDs indicate the battery level. They turns off when no battery is installed in the printer.

Battery LED	Approximate battery level
	60 to 100%
	20 to 60%
	10 to 20%
	10% or less
	0% (printing not available)

Troubleshooting

When the Roll Paper Jams

When a paper jam occurs, never pull out the paper with too much force. Open the roll paper cover and remove the jammed paper.

Follow the procedure below to remove jammed paper.

WARNING:

Do not touch the thermal head and its surroundings. They may be hot immediately after printing.

CAUTION:

If you touch paper before printing is finished, a paper jam may occur.

CAUTION:

If you touch paper before printing is finished, a paper jam may occur.

CAUTION:

If you touch paper during printing or before cutting operation is finished, a paper jam or auto cutter error (unable to cut) may occur.

- 1 Turn off the printer.
- 2 Disconnect the USB cable, if it is connected.
- 3 Open the roll paper cover.
- 4 Remove the jammed paper.
- 5 Install the roll paper and close the roll paper cover.

Troubleshooting

Troubleshooting

When the Roll Paper Cover does Not Open

If the roll paper cover does not open even after pulling the cover open lever, turn the printer off and then on again.

Troubleshooting

Printout is Faint

If your print out is faint or banding appears as shown below, the thermal print head may be stained badly. Clean the thermal print head and check that the problem is solved.

-  ?Cleaning the Thermal Head? on page 39
-  ?Cleaning the Platen Roller and Paper Detector? on page 41

Troubleshooting

Cannot Print

If there is no error but printing is still not possible, check the Wi-Fi LED or Bluetooth LED to make sure that the printer is properly connected to your computer, smart device, etc.

Run the self-test to check if printing is possible.

Follow the steps below.

- 1 Close the roll paper cover.
- 2 While pressing the  Feed button, turn on the printer. (Hold down the  Feed button until printing starts.)

After printing the current print status, a continuing self-test guidance is printed, and the  power LED flashes.
- 3 Briefly press the  Feed button (less than one second) to continue the self-test.

The printer prints using the built-in character set.

After [***completed***] is printed, the printer is reset and switches to standard mode.

Restriction of Use

When this product is used for applications requiring high reliability/safety, such as transportation devices related to aviation, rail, marine, automotive, etc.; disaster prevention devices; various safety devices, etc.; or functional/precision devices, etc.; you should use this product only after giving consideration to including fail-safes and redundancies into your design to maintain safety and total system reliability. Because this product was not intended for use in applications requiring extremely high reliability/safety, such as aerospace equipment, main communication equipment, nuclear power control equipment, or medical equipment related to direct medical care, etc., please make your own judgment on this product's suitability after a full evaluation.

CAUTIONS

No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, without the prior written permission of Seiko Epson Corporation.

The contents of this manual are subject to change without notice.

While every precaution has been taken in the preparation of this manual, Seiko Epson Corporation assumes no responsibility for errors or omissions.

Neither is any liability assumed for damages resulting from the use of the information contained herein.

Neither Seiko Epson Corporation nor its affiliates shall be liable to the purchaser of this product or third parties for damages, losses, costs, or expenses incurred by purchaser or third parties as a result of: accident, misuse, or abuse of this product or unauthorized modifications, repairs, or alterations to this product, or (excluding the U.S.) failure to strictly comply with Seiko Epson Corporation's operating and maintenance instructions.

Seiko Epson Corporation shall not be liable against any damages or problems arising from the use of any options or any consumable products other than those designated as Original Epson Products or Epson Approved Products by Seiko Epson Corporation.
