Assessment NO.: AN05T4590, Notice#1

Dear Helen,

Replying your questions.

1. The FCC ID label format and location is attached. The user manual is also revised.
2. Please refer to revised test report.
3. Please refer to revised test report.
4. There are no different between these two colors. They are the same except color.

Best regards,

S. S.

AN05T4590, Notice#1

Question #1: Please provide FCC ID label format.

Question #2: Please provide one more plot to show the transmission will
cease within 5 seconds after deactivation.

Question #3: The test report indicates the period of pulse train is 13.04ms,
Please show plots of the complete pulse train or a period of 100ms, including
silent period.

Quesiton #4: External Photos show white device and black device. But the
test report indicates one model only. So what is the difference between the
white and the black except for color?

Best Regards,
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
