Subject: FCC ID: BV8MCS800A025
IC: 3670195674A
Class II Permissive Change

M/A-COM wishes the subject Equipment Authorization Grant processed for a Class II Permissive Change. The request is for review of the BCX transceiver board, as it pertains to a change in the receiver front end amplifiers for this 800 MHz cell station used in the Public Safety band.

This station is now to use a duplexer which no longer has an LNA (passive duplexer). The LNA block is moved to the BCX board. The BCX transceiver board is designed to accommodate both the old and new duplexer by cable connection to the appropriate board connector. The updated BCX board block diagram shows this change, and capability.

Rhein Tech Laboratories, Inc. agent authorization letter to act on M/A-COM's behalf for this change request, has been provided as an exhibit as well, along with test report.

Sincerely,

A handwritten signature in black ink that reads "Daryl S. Popowitch". The signature is stylized with a large, looped "D" and a cursive "S".
