Xbox 360 Wireless Controller

Label placement

Dear FCC:

Due to recent FCC instructions on the label placement, CCS-TCB is in the process of reviewing an application which may not comply with label placement policy.

The pictures below are the retail package of Xbox 360 Wireless Controller, FCC ID:C3K-WKS368 granted on Sept 13, 2005. CCS-TCB has received application for original approval on the Xbox 360 Wireless Controller due to MS has changed the Radio chipset. The proposed FCC ID number is C3K-WC01. C3K-WC01 is proposing to use the same labeling method as C3K-WKS368. CCS would like to confirm with FCC that the proposed label placement is acceptable by FCC or not.
