Request for transmitter Limited Modular Approval (LMA)

Transmitter Module Characteristics

Item	Requirements	EUT
1	Have its own RF shielding	Device is equipped with Metal shielding to cover RF section. Refer to internal photos
2	Have buffered modulation/data inputs (if such inputs are provided),	All inputs to the modules are buffered through logic or microprocessor inputs.
3	Have it own power supply regulation	Internal 3.3 power regulator. Refer to Schematic diagram
4	Meet the antenna requirements of Section 15.203	Device is equipped with permanently attached directional patch antenna Refer to external photos
5	Be tested in a stand-alone configuration, i.e., the antenna, AC or DC power and data input/output lines must be connected to the module but, the module must not be inside another case during testing	Device was connected to the laptop via an external USB cable for testing for modular approval. Refer to setup photos.
6	Be labeled with its own FCC ID number, and if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module.	This module will only be installed by the applicant inside the game console and will never be sold as module. FCC ID number with “ Contains FCC ID:C3K-WKS268 “ will be affixed on the outside of game console.
7	The modular transmitter is manufactured so that the user cannot influence the operation of the transmitter that will operate outside of the scope of the regulations.	No user adjustable features will be provide. The module is installed inside game console and the game console requires special tool to access the module.
8	Address compliance with the Commission's RF exposure limits in Sections 1.1310 and 2.1093. In addition, spread spectrum transmitters	This module will be installed in a game console which satisfy the

	operating under Section 15.247 are required to address RF exposure compliance in accordance with Section 15.247(b)(4).	definition of mobile device per section 2.1091 of FCC rules. MPE estimate is included in the test report to justify RF exposure compliance.
