

The image shows the internal components of a white electronic device, likely a power supply or a small computer case. The components are mounted on a metal chassis. A large white fan is visible at the top. Below it, a DAETVOO DC-DC converter is mounted, with a label that reads "DAETVOO DC", "RM228", "48127AD JDF", and "CAUTION". To the right of the converter is a power transformer with a label that includes "110V/220V", "MADE IN TAIWAN", "POWER RATING", "50/60 HZ", "100W", and "1.5A". Various colored wires (red, blue, green, black) are connected to the components. A yellow component with a label "5V 1.5A 31P" is visible at the bottom. The device is placed on a wooden surface.
