

The photograph printed at right will help you to identify the main controls used in tuning and adjusting the T837.

There is a similar photograph in [Figure 1.3](#) which shows the main circuit blocks.

Extending both these fold-outs will allow you to refer to both photographs while using the manual.

Key

The upper number is the component identification number which appears in the "Legend" column of the Mechanical & Miscellaneous Parts on the facing page.

The lower number indicates how many of this component are used in this location or function.

%R150 (10Ω) is fitted only when the T836 is used in a Series I rack frame (refer to Part I for full details).
