T2020-345-A87

RF Safety Requirements.

Referring to CFR 47, Volume 1, Part 1.1307:

" (1) The appropriate exposure limits in Secs. 1.1310 and 2.1093 of this chapter are generally applicable to all facilities, operations and transmitters regulated by the Commission. However, a determination of compliance with the exposure limits in Sec. 1.1310 or Sec. 2.1093 of this chapter (routine environmental evaluation), and preparation of an EA if the limits are exceeded, is necessary only for facilities, operations and transmitters that fall into the categories listed in table 1, or those specified in paragraph (b)(2) of this section. All other facilities, operations and transmitters are **categorically excluded** from making such studies or preparing an EA, except as indicated in paragraphs (c) and (d) of this section. "

(2) "Mobile and portable transmitting devices that operate in the Cellular Radiotelephone Service, the Personal Communications Services (PCS), the Satellite Communications Services, the General Wireless Communications Service, the Wireless Communications Service, the Maritime Services (ship earth stations only) and the Specialized Mobile Radio Service authorized under **subpart H** of parts **22**, 24, 25, 26, 27, 80, and **90** of this chapter are subject to routine environmental evaluation for RF exposure prior to equipment authorization or use, as specified in Secs. 2.1091 and 2.1093 of this chapter. Unlicensed PCS, unlicensed NII and millimeter wave devices are also subject to routine environmental evaluation for RF exposure prior to equipment authorization or use, as specified in Secs. 15.253(f), 15.255(g), and 15.319(i) and 15.407(f) of this chapter. All other mobile, portable, and unlicensed transmitting devices are **categorically excluded** from routine environmental evaluation for RF exposure

under Secs. 2.1091 and 2.1093 of this chapter except as specified in paragraphs (c) and (d) of this section.”

This radio is submitted under parts 22 and 90 (but not subpart H) which does not fall within the categories requiring an EA and therefore is "categorically excluded".

Regards,

Garry Pringle
