Nemko North America, Inc.
303 River Road, Ottawa, ON K1V 1H2 Canada
Attn: Director of Certification

Family Certification request letter - FCC

FCC ID: CFDLN01FRUDB
Model numbers: 44R26-N25N66-AC, 44R26-N25N66-DC
Model names: N25N66 Dual Band Radio Unit

We, Fujitsu Network Communications, INC, hereby request certification for a product family under a single application and FCC ID. The base model and its variants share the same core design and technical characteristics, with only minor differences that do not affect compliance with FCC requirements.

Details of the product family are as follows:

Base Model: 44R26-N25N66
Variant Models: 44R26-N25N66-AC; 44R26-N25N66-DC

Justification:

All models listed above are RF electrically and mechanically identical, and share the same antenna type and gain, with variations limited to main power sources either AC power 90-240VAC or DC power -36 - -60VDC. These differences do not impact RF performance or compliance with applicable regulations. The test results obtained for base model within this family can be applied to all other model variants, considering their similarities

We respectfully request that these models be certified under a single application to streamline the approval process and ensure consistent regulatory compliance.

Should you require any additional information or documentation, please do not hesitate to contact us.

Sincerely,
