

EXHIBIT 1

CFS8DL5800RL

Functional Description.

The **5800RL** remote relay is part of Ademco's wireless 5800 alarm system.

It is used in conjunction with the alarm system and provides remote activation of an alarm indicator (bell, siren, etc.) or other devices.

These messages are transmitted at 345Mhz +/-82kHz using on-off keyed AM modulation.

The **5800RL** sends a regular supervision message, once every 72 minutes. It sends no other messages except responses to control messages initiated by the alarm system, and tamper messages.
