

This wireless heat / smoke detector is intended for use with Honeywell controls that support SiX™ series devices.

NOTE: After enrolling and before mounting permanently, conduct Go/No Go tests (see controller's instructions) to verify adequate signal strength. Adjust the device location and orientation as necessary.

Mount

NOTE: Once enrolled, the device cannot be used with another system until it is removed from the current controller. See the controller's instructions.

Programming Mode > Zones >
Add New > Serial Number

For programming Smoke or Heat alarms and Tamper, see the Controller's instructions.
NOTE: All smoke detectors programmed in the panel to operate in one-go-all-go mode will sound on alarm.

To silence the detector:

Press the test switch or disarm the system at the controller. If the alarm condition continues, the detector is only quiet for 5 minutes. When programmed in one-go-all-go mode, the test switch will not silence the detector.

*Use UL/ANSI Approved canned smoke.
