CFS8DLPHS8-US GRANT UPDATE REQUEST FCC COVER LETTER

Date: 06/24/2015

To Whom It May Concern:

This letter is to inform you of our request to submit more detailed calculations to the RF exposure information presented with our recent application for a Class 2 Permissive Change for our cellular radio module known as: CFS8DLPHS8-US. Via working on the IC submittal for this module, it was learned the RF exposure corrections used for the FCC application could be taken further. This will ultimately affect the permissible antenna gains which are stated in the grant notes. This request is accompanied by new exhibits showing the new RF exposure information, and an updated version of the user manual.

Regards,

x

Mark Schmitt
