

FCC ID/IC and Label location

This 60GHz module is too small to display the FCC ID, FCC rule part etc., the HVIN and ISED certification number directly on the product. In addition, it is not feasible to place them on the module enclosure, as doing so could adversely affect RF performance. (The detailed explanation is given in Annex 3 of Technical Specification).

Under these circumstances, we will state FCC ID/IC in the user manual and on the packing box in accordance with §2.925(f) and KDB784748 D01, Session 3/ RSS Gen 4.1.

FCC ID/IC location in the user manual

Label location on the packing box.
