The sequence is used : Transmitting

1. AMPS
2. CDMA
3. CDMA 1X (with modulation using the Universal Radio Communication)
4. PCS
5. PCS 1X (with modulation using the Universal Radio Communication)

Two Antenna Types for Radiated test :

1. Type 1:842-894MHz(AMP/CDMA):3.5dBi Max.
1850-1990MHz(PCS):4.5dBi
2. Type 2:842-894MHz(AMP/CDMA):0.3dBi
1850-1990MHz(PCS):-0.92dBi

Justification : The system was configured in typical fashion (as a customer would normally use it) for testing.

4.2.1 Configuration and peripherals

* Cabling was taken into consideration and test data was taken under worst case conditions.

SECTION 5: Peak Output Power (Conducted / Radiated)

[Conducted]

Test Procedure

The peak output power (conducted) was measured with a power meter and an attenuator at the antenna port.

Test data : APPENDIX 3
Test result : Pass
Test instruments : APPENDIX 2
MCC-04, MAT-15, MPSE-03, MPM-01

[Radiated]

Test Procedure

The peak output power (conducted) was measured with a power meter and an attenuator at the antenna port.

For radiated peak output power, EUT was placed on a platform of nominal size, 1m by 1.5m, raised 80cm above the conducting ground plane.

Test was made with the antenna positioned in both the horizontal and vertical planes of polarization.

The Radiated Electric Field Strength intensity has been measured at the semi anechoic chamber (7.5 x 5.8 x 5.2m) and at a distance of 3m.

The measuring antenna height was varied between 1 to 4m and EUT was rotated a full revolution in order to obtain the maximum value of the electric field intensity.

The measurements were performed for both vertical and horizontal antenna polarization.

An appropriate substitution antenna selected depending on measurement frequencies replaces the EUT in the same position.

The signal generator connected to the substitution antenna is adjusted to the measurement frequency and the level, which produces the equipment the same electric field strength at the measurement antenna. The measurement were performed for both vertical and horizontal antenna polarization.
