

FCC ID: DD4UT1B

LIST OF CRYSTAL FREQUENCIES

The following is a list of crystal frequencies used in the Transmitter Model No: UT1B

The UT1B has a single crystal that is $1/36^{\text{th}}$ of the carrier frequency -10kHz .

Thus for 740MHz the crystal will be 740 divided by $36 = 20.55555556\text{MHz} - 10\text{kHz} = 20.54555556\text{MHz}$.
