

Inside

CARE AND CLEANING CARE - Store in a clean, dry place. - When stored, ensure the cable is not pinched or crushed, as this may damage the product. - This product will experience qualitative changes under excessively high temperatures in transportation or in storage over time. - If storing the product for an extended period, keep the battery partially charged (around 50%). - Do not store in direct sunlight such as the dash of a car or at temperatures above 131°F (55°C). - Do not store below 32°F (0°C). - Eartips must be regularly inspected for cracks, worn parts and for proper fitting. Replace cracked or worn parts as needed. CLEANING - Clean eartips, cord, and control box with a damp cloth and mild soap. Remove any soapy residue and dry thoroughly. - Do not use solvents, or harsh or abrasive chemicals. - Do not use a disinfecting wipe as they may contain ingredients that can dry out the material. - Do not immerse in water.	FAQS Q: I cannot connect to Bluetooth. What should I do? A: Try the following suggestions. If one step doesn't resolve the issue, go to the next step. - Make sure you are double pressing the Power button quickly enough to put into pairing mode (2 presses in less than 1/2 second). - Make sure you are searching/scanning for Bluetooth® devices on your phone. - Turn your phone's Bluetooth® off and on. - Turn your phone completely off and turn it back on. - You may have too many other Bluetooth® products paired to your phone. Try to "forget" or "unpair" some and try connecting again. - Check to see if your phone needs any system updates, and update if needed. - Perform a "Factory reset" on your hearing protection device (see last FAQ). - If you still cannot pair, you will need to contact your phone's manufacturer for help as it is likely an issue with the phone's Bluetooth® firmware. Q: Can the Hearing Protector be used in wet conditions? A: This hearing protector is not waterproof, meaning that it is not meant to be submerged in water. However, we realize that it may not be possible to keep the unit dry at all times. Thus, the hearing protector was designed to tolerate moisture that you might encounter with outside lawn and gardening work (i.e., perspiration, a light rain, etc.). Q: How do I turn my device back on after it Auto-Shuts off? A: Press and hold the power button for 2 seconds. Q: Is there a light and LED? A: There is an L and R printed on the outside of each earbud to help you orient the device in your ears. The control box should be on the right side of your head.	Q: How long is the manufacturer's warranty? A: There is a one-year limited warranty for this product. See Warranty section for more information. Q: How do I reset the unit? (Factory Reset) A: A factory reset will restore all default settings and clear any remembered devices. To perform a Factory Reset, start with the headset powered on, then press and hold the Power/Bluetooth button for 10 seconds. The LED light will flash three times and the audio assist will say "Factory reset. Power off." The device has now been reset to its default settings.	
SPECIFICATIONS AND APPROVALS FCC INFORMATION This device complies with Part 15 of the U.S. Federal Commission Rules (FCC) Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Modifications to this device shall not be made without the written consent of 3M Company. Unauthorized modifications may void the authority granted under FCC rules permitting the operation of this device. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: - Reorient or relocate the receiving antenna. - Increase the separation between the equipment and receiver. - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. - Consult the dealer or an experienced radio/TV technician for help.	This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. ISED INFORMATION This device complies with Industry Canada's ICES license-exempt Radio Standards Specifications (RSSs). Operation is subject to the following two conditions: - This device may not cause interference; and - This device must accept any interference, including interference that may cause undesired operation of the device.
