

Critical Component of MHN02L(TX)

Component	Part Number	Description
ENCODER HT12E	U1	Encode the RF signal , drive LED
CD40106BC	U2	Low battery detect, Generate about 1.5Hz wave for low battery LED display
LED	LED1	Light on when transmit signal, flash when low battery
Rubber key	On/off	Input command
DIP switch (4)	DIP1	Generate different address code
RF transistor MMBTH10	Q1	Generate oscillation of RF frequency 350MHz and as modulator
SAW RESONATOR 350MHz	SAW1	Generate oscillation of RF frequency 350MHz
