

airtv 3

Let's get started!

Regulatory Information

Important Safety Instructions

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit the apparatus.
10. Only use attachments/accessories specified by the manufacturer.
11. Unplug this apparatus during lightning storms or when unused for long periods of time.
12. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
13. The AC-DC power supply and cord shall remain readily operable so that the apparatus can easily be disconnected from AC power.
14. The AC-DC power supply is still connected to AC power whenever the power supply is plugged into a live power outlet even if the apparatus LEDs indicate it is off.
15. If using an outdoor antenna follow NEC guidelines included with the antenna for grounding of the coaxial cable.

WARNING

Cancer and Reproductive Harm
www.P65Warnings.ca.gov

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

This device must be installed at least 20cm (~8 inches) from typical person locations per FCC RF exposure guidelines.

Do not make any modifications to this device, doing so may void your authority to operate it.

NOTE: This device has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

What's included

airtv 3

Power Supply

What you'll need

HD antenna and coaxial cable

Visit airtv.net/OTA for more information. Channel availability is subject to local geography and antenna placement.

Android or iOS mobile device (phone or tablet) for setup

Broadband Internet access with WiFi for streaming

External USB hard drive for recording local channels (optional)

Before you start...

Place your HD antenna in the best location for receiving the most and strongest local signals. You don't need to permanently mount your antenna just yet, as you may need to adjust it later for optimal performance.

You can get the best reception from your antenna by following these tips:

- ✓ Try a window first
- ✓ Higher is better
- ✓ Point it toward your broadcast towers

For more tips and information on the ideal placement for your type of antenna, visit airtv.net/OTA.

Connect your airtv 3

1

Connect to antenna

Connect an HD antenna to your airtv 3 using a coaxial cable.

2

Connect to Internet

Connect your own Ethernet cable from your router or modem. For WiFi, you will connect your airtv 3 to your network by using the Sling app on your mobile device in the next step.

3

Connect to power

Connect the power cable and the Power light on the front of the unit will blink. Other lights may blink as well, which is normal.

Need to start over?

If you need to restart the installation process while configuring your airtv, push the end of a paper clip into the **RESET** port for 12 seconds (until the front panel lights blink twice) to factory-reset the unit.

Configure your airtv 3

Complete setup using the **Sling** app, which integrates all of your live TV channels, including Sling and your HD local channels.

1. On your mobile device, connect to your home WiFi network that airtv will connect to.
2. Open the Sling app and sign in. If you don't have the app, download and install it from your app store, then create your free Sling account at Sling.com/airtv.
3. In the Sling app, access **Sling TV Settings » Over-the-Air Channels**.
4. Follow the on-screen instructions to connect to your home WiFi network and scan for channels.

If you don't see some of your available local channels after the channel scan completes, make sure that your antenna is placed in the best location, then rescan for channels. You can find tips for improving your signal at airtv.net/OTA.

5. Once your setup is complete, you can access your local channels on your airtv mini iOS, Android, Fire TV and Roku devices via the Sling app. Visit airtv.net to see a complete list of devices compatible with airtv 3.

Note: airtv 3 supports up to 4 simultaneous streams, only 1 of which can be outside the home where airtv is located.

Using the DVR feature (optional)

Connect a hard drive to the airtv 3 USB port and follow the on-screen steps in the Sling app.

Start recording your local channels. If you need help visit airtv.net/help.
