

2. Transmitter section (Child unit)

Spurious Reject and Antenna Match

L1,C1,C2, are constructed for Antenna match and Spurious reject.

3rd Frequency Multiplier and RF Power amplifier

Q3, Q8, T2, T3 function as 3rd frequency multiplier and RF power amplifier.

Local Oscillator and modulator

Q4,C16,C17,X1,X2,VD1,T4 function as local oscillator and modulator; The difference channel is selected by SW2-A;

Mic amplifier and AGC

MIC,R29, R25,R3 C23 and built in IC U1 function as Mic amplifier;Q2,Q1,C27, are used for AGC control.

Regulator

Transistor Q7,DZ2,C28 is a regulator designed in the baby unit to provide constant voltage onto MIC amplifier, RF power amplifier circuit etc.

. SW-01 control Power ON/OFF;
