Columbia, Maryland 21046

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for FCC Class II Permissive Change certification of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This Class II Permissive Change is for approval to add the Dell notebook computer Latitude | D610 (MN: PP11L) with an INTEL PRO/Wireless 2200BG Network Connection (MN: WM3A2200BG) installed in its Mini PCI slot to the approved FCC ID: E2K24GBRL. The INTEL PRO/Wireless 2200BG Network Connection is a dual band WLAN adapter (802.11b and 802.11g). The notebook computer was tested with a set of Hitachi and Foxconn antennas continuously transmitting and receiving form the MAIN and AUX antenna ports.

For this submittal the INTEL PRO/Wireless 2200BG Network Connection is not considered the EUT (Equipment Under Test). The EUT is the Dell notebook computer (MN: PP11L).

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

Rick Candelas
