

FCC Radio Frequency (RF) Exposure Information

This device has been evaluated to, and shown to be compliant with, the FCC Radio Frequency (RF) exposure limits.

Interference Statement

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the manufacturer's instruction manual, may cause interference with radio and television reception. This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1) This device may not cause harmful interference.
- 2) This device must accept any interference received, including interference that may cause undesired operation.

Notice: The FCC regulations provide that changes or modifications not expressly approved by Dell Inc. could void your authority to operate this equipment.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference with radio or television reception, which can be determined by turning the equipment off and on, you are encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Relocate the system with respect to the receiver.
- Move the system away from the receiver.
- Plug the system into a different outlet so that the system and the receiver are on different branch circuits.

If necessary, consult a representative of Dell Inc. or an experienced radio/television technician for additional suggestions.

NOTE: Any additional Wireless module must be installed and used in strict accordance with the manufacturer's instructions as described in the user documentation that comes with the product. Any other unauthorized installation or use will violate FCC Part 15 regulations. Modifications not expressly approved by Dell could void your authority to operate the equipment.

Prohibited for control of communications with unmanned aircraft systems, including drones.

United States

Usage Restrictions for Products that incorporate a Wireless LAN 802.11ax that contains 5.925 - 7.125 GHz band Interface

Operation of transmitters in the 5.925 - 7.125 GHz band is prohibited for control of or communications with unmanned aircraft systems.

WAPs and subordinate devices - The operation of this device is prohibited on oil platforms, cars, trains, boats, and aircraft, except that operation of this device is permitted in large aircraft while flying above 10,000 feet.

Usage Restrictions for Products that incorporate a Wireless LAN operating in the UNII-4 Band (5.850 - 5.895 GHz) Interface

Products that fall into this category are restricted to indoor use only.

WAP devices and Subordinate devices - FCC regulation restrict the operation of this device to indoor use only.

Subordinate devices - This device cannot be used to provide connections between separate buildings or structures.
