S-TAG Datasheet

S-Label (Electronic Label System)

REV 0.1

Samsung Electro-Mechanics

2015-07-01

Summary

This datasheet presents the general performance and specifications of S-Tag for S-Label ESL (Electronic Shelf Label) system, which is based on IEEE 802.15.4.

1 General Description

This S-Tag product is a part of Samsung S-Label (Electronic Shelf Label) system as well as S-Label Gateway (S-Gate), Remote controller (S-RC). S-Label system make up a system that electronically displays price and other product information on S-Tags, which has been traditionally printed or written on paper in places like retail markets.

S-Tag receives product price/information updates from S-Gate and updates or changes its display of price and other information.

S-Tag is the product based on IEEE standard 802.15.4 for low power wireless communication applications. S-Tag consists of RF transceiver, RF circuitry and 8051-compatible MCU offering IEEE 802.15.4 based network protocol and MAC protocol and other peripheral devices.

Preliminary

1.1 Features

- Display : E-Paper active type Display (6.0 Inch, 128 Dpi, 600 * 448 Pixel)
- Communication : Wireless communication based on IEEE 802.15.4 (2405~2480MHz)
- Operating on 2.4GHz Unlicensed ISM band for ZigBee
- Low Power Consumption
- External Wakeup : RF Wakeup (Using ISM Band(2.4GHz))
- Outline Dimension : 134.4 mm x 109.5 mm x 14.2 mm
- Working condition: Indoor where wireless communication is available.
- NFC(13.56MHz) Available

1.2 Typical Applications

- Retail industry with electronic displays, platforms, solutions and services.
- Intelligently communicating, managing, and optimizing price and product information.

1.3 Appearance

Figure 1 Appearance

Preliminary

2 Specification

2.1 Product Specification

Item	Description
Size	134.4 mm x 109.5 mm x 14.2 mm
Battery	CR2450 Lithium Battery (3V, 4PCS) 2.5 ~ 3.3Vdc(condition : In active status)
Display	E-Paper active type Display (118.80 * 88.26 mm, 128 Dpi, 600 * 448 Pixel)
Housing Color	White
Information display	Price, Unit, Symbol etc.
Communication	Wireless communication based on IEEE 802.15.4 (2405~2480MHz)
Communication Distance	Radius 20m (Line of Sight)
Operation Temp.	0 ~ 40 °C (@20~60% RH)
Etc.	No additional anti-theft locking structure : Rail Mounted only

2.2 Radio (RF)¹ Specification

Item	Parameter	SPEC			Unit	Condition
		Min	Typ	Max		
TX	Transmit Power	6	8	10	dBm	
	Error Vector Magnitude		10	30	%	When measured for 100 chips
	Tx Current			40	mA	Total current at max Tx Power
RX	Receiver Sensitivity	-90	-	-	dBm	PER < 1%

¹ Test Channel : 2480MHz

Preliminary

2.3 NFC Specification

Items	Parameter	spec.			Units	Condition
		Min	Typ	Max		
NFC	Read/Write Distance	-	40	-	mm	PCB status
NFC	Read/Write Distance	-	30	-	mm	Final Assy status

2.5 Labels

2.5.1 Code Information

Serial 1, 2 Code Value

13	Y	5	S	A	A	2JW
①	②	③	④	⑤	⑥	⑦

- ① Year : Last two digits of manufacturing year.
(00 ~ 99, Example : 2013 is '13')
- ② Month : Manufacturing month
(1 ~ 9, X(10), Y(11), Z(12))
- ③ Date : Manufacturing date
(1 ~ 9, A(10) ~ V(31))
- ④ Vendor : Manufacturing vendor
(S : SEMTHAI, T : TSEM, etc)
- ⑤ Line number : Manufacturing Line number
('A', 'B', 'C', etc)
- ⑥ Revision : Product revision number
(A : First, B : Second, C : Third, etc.)
- ⑦ ZigBee IC Lot Number : Last 3 characters of Lot Number
(Example : YME06862JW is '2JW')

2.5.2 Mac Label Drawings

Figure 3 Mac Labels

Product information is indicated in a printed sticker label. The information consists of MODEL (model name), MFD (manufacturing date), S/N (serial number), MAC (MAC address), certification mark, and Manufacture (SEMCO).

- 1) FCC ID : E2X-ST-GM6000N
- 2) Model Name : ST-GM6000N
- 3) MFD : (Month).(Date).(Year) ex) MAY.16.2013
- 4) S/N : Daily Production quantity (5 digits) & Serial Number Information (hexadecimal 10 digits)
- 5) MAC : barcode & barcode number(hexadecimal 12 digits)
 - 8 digits (1st ~ 8th) : XXXXXXXX (Extension ID)
(Increasing number : 00000000~FFFFFFFF)
 - 2 digits (9th~10th) : 64 (Tag size & type)
 - 1 digits (11th) : 3 (Attribute, 3 : Ultra IC & NFC IC)
 - 1 digits (12th) : X (Checksum : XOR calculation value 1~11 digits, 0~F)

Preliminary

3 Package

VACUUM BAG : LABEL – BAG 1EA / OUTBOX : LABEL – OUTBOX 4EA (L,R 2SETS)

Pallet : 1,200 X 1,000 (mm)

Preliminary

4 Cautions for Treatment

Provisions should be made to protect against any damage to the product caused by improper handling.

It is highly recommended that the product should be installed within 3 months from the date of arrival in the logistics hub. Recommended storage condition is in 0-40 Celsius degree, 20-60% RH environment.

This RF device operates on the 2.4GHz frequency band and can produce radio interference. The device, therefore, may not be used for applications where safety of human lives is concerned.

4.1 Usage Environment

Take extra cautions when using this RF device in the vicinity of other electronic devices and appliances. Most electronic devices and appliances use electromagnetic waves. Electromagnetic waves emitted by this RF device can affect other electronic devices and appliances.

If using the device in an explosion hazard area, follow all safety regulations, instructions, and signals.

4.2 Storage and Use

- Moisture and liquids can damage internal parts and circuit boards if allowed to enter into the device itself.
- Do not place or store the product on a sloped surface. The product may slide and fall off the surface and damaged.
- Use the product in temperatures ranging from +0°C to +40°C. Parts and circuits may be damaged if used or stored under temperature extremes.
- The display panel needs extra care when handling.
 - Do not apply any impacts on outside since e-Paper display is fragile.
 - Continuous exposure to excessive moisture (over 60% RH) or UV makes display lifetime shortened.
 - Ghosting image may be appeared in temperature conditions of less than 15 Celsius degree.
- Avoid areas with strong magnetism or subject to magnetism. Contact between the device and a magnetic object can lead to malfunctions.
- Do not place the product near heat-producing kitchen appliances like a stove or a microwave or in

Preliminary

the vicinity of highly pressurized containers.

- External impact to the product, such as from being dropped, can damage the product or battery casing can be separated.
- Twisting and bending the product can damage the exterior casing and the internal components.
- If this product operates abnormally in eliminating battery vinyl or replacing battery, you should discharge it by contacting battery terminal (+) and (-).
- This product uses 2.4GHz frequency band for wireless communication network. Radio communications can be limited or affected by other applications which share same frequency band, such as Wi-Fi, Bluetooth, ZigBee, etc.
- Frequent communications, updates and screen renewals may reduce battery life time.

4.3 Battery Replacement

4.3.1 Audience

Authorized persons with the following knowledge are allowed to replace the battery.

- Battery
 - Electronic assemblies like circuit board
 - Compliance of the instruction
- ※ Note : If not authorized person, it will not give any warranty.

4.3.2 Instructions

- Risk of explosion through incorrect battery replacement.
 - Keep attention that your hands are dry before you start with replacement.
 - When replace the battery, please contact right person and get a instructions.
- ※ Note : Battery rarely has a little stain or leak.

4.3.3 Steps

1. Open the battery cover.
2. Take out the batteries.
3. Put in the new batteries.
4. Check the batteries direction.
5. Put the battery cover.

4.4 FCC

FCC ID : E2X-ST-GM6000N

WARNING : This equipment may generate or use radio frequency energy. Changes or modifications to this equipment may cause harmful interference unless the modifications are expressly approved in the instruction manual. The user could lose the authority to operate this equipment if an unauthorized change or modification is made.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, Including interference that may cause undesired operation.

NOTE : This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications, However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution

This device complies with FCC radiation exposure limits for an uncontrolled environment.

Avoid operating this device at a distance less than 20cm from the user
