

The conducted carrier power was measured at -6 dBm for channel 1, at 2.4117 GHz by setting the resolution/video bandwidth to 100 kHz/300 kHz. The highest spurious emission within 2.310 GHz and 2.390 GHz was measured -49.3 dBm at 2.3875 GHz. The difference between the two measurements was subtracted from the radiated 3 meter field strength of the carrier at channel 1. The emission was in the restricted band at 2.390 GHz = 93.8 dBuV/m - 43.3 dB = 50dBuV/m.
