

Exhibit 12: Operational Description**§ 15.203 Antenna Requirements**

The Mini Base (four antenna) uses a printed antenna that connects to the main board using special connectors. The Mini Base (five antenna) the fifth antenna is connected to the main board via coax cable using special connectors. The same type as specified by the manufacturer can only replace these antennas; therefore, it meets the requirements of this section.

§ 15.307 Coordination with fixed microwave service

Enclosed on the following page is the UTAM affidavit stating compliance to this section.

UTAM Affidavit

Communication Certification Laboratory

April 1, 1999

TADIRAN TELECOMMUNICATIONS LTD.
Yaron Shaul
6021 - 142nd Avenue North
Clearwater, FL 34620

Dear Yaron:

On behalf of UTAM, Inc., Communication Certification Laboratory, has certified that the equipment identified below, meets the disablement and location verification process (LVP) requirements of FCC Rule 15.307, and qualifies as a UTAM approved coordinatable device.

Applicant: CTP Systems Ltd.
UTAM Member Number: TADIRAN1
UTAM Certification ID: E3XCCLUM00010
FCC ID Number(s):
Base Station: E3X-1900-BS-B1
Model number(s):
System: CoralAIR/AirEASE
Base: CoralAIR, & AirEASE Mini Base Station
P/N 72450910810

Any changes to the (LVP) or disablement mechanism and procedure or any changes to the FCC Certification may require recertification by UTAM, Inc. Please document and forward the details of any changes to Communication Certification Laboratory.

Communication Certification Laboratory will continue to maintain strict confidentiality regarding the engineering and functionality of your product, including the disablement and location verification mechanism.

A copy of this affidavit shall be included with your application for certification by the FCC, in accordance with FCC Part 15, Subpart D.

Sincerely yours,

Richard D. Foster
