FCC 2.1033(c)(14)/2.1046/22.913(a) - RF POWER OUTPUT

§22.913 Effective radiated power limits. - The effective radiated power (ERP) of transmitters in the Cellular Radiotelephone Service must not exceed the limits in this section.

(a) Maximum ERP. The effective radiated power (ERP) of base transmitters and cellular repeaters must not exceed 500 Watts. The ERP of mobile transmitters and auxiliary test transmitters must not exceed 7 Watts.

The EUT is a RF amplifier. The manufacture does not provide an antenna for sale with the product, hence ERP is not measured nor calculated. The end user of this product is to exercise proper engineering judgement to select the appropriate antenna to comply with the EIRP limitation set forth by FCC22.913(a).

The RF power of the EUT was measured at the antenna port with a RF Average Power meter. The measurement satisfies the above requirement by demonstrating the measured power is below 500 watts.

Test setup: The EUT is placed on the wooden table. The RF port is connected to a support Signal Amplifiers and Signal Generator. The RF Output is connected to a RF load and a directional coupler. The RF power of the EUT is monitored at the output of the directional coupler and the RF input signal is adjusted to maintain the output power.

869.2 MHz, 881.5 MHz, 893.8 MHz

Conclusion: As indicated below, each single channel does not exceed the power limit.

Test Conditions / Notes:

The EUT is placed on the wooden table. RF Input port is connected to a remote support signal amplifier and a signal generator. The RF Output is connected to a remote RF load and a directional coupler. The RF power of the EUT is monitored at the output of the directional coupler and the RF input signal is adjusted to maintain the output power. Tx Power: 40 Watts. Modulation: EDGE and GSM. Frequencies: 869.2 MHz, 881.5 MHz, and 893.8 MHz. Chassis: Machined and Cast. Frequency range of measurement = 9 kHz - 9 GHz. 9 kHz - 150 kHz; RBW=200 Hz, VBW=200 Hz; 150 kHz - 30 MHz; RBW=9 kHz, VBW=9 kHz; 30 MHz - 1000 MHz; RBW=120 kHz, VBW=120 kHz, 1000 MHz - 9GHz; RBW=1 MHz, VBW=1 MHz. -27VDC, 20°C, 50% relative humidity.
