

DURATION OF RF TRANSMISSIONS

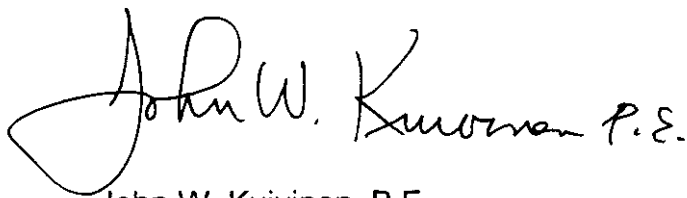

MCT-2

HAND HELD REMOTE CONTROL TRANSMITTERS

The transmitters are manually activated. They are used only for remote control of a garage door or gate control system. As such they may be operated continuously by the user (FCC Rules 15.231(a)(4)). However, due to battery constraints and an accidental continuous activation causing interference to the system, the maximum manually activated transmission is no longer than 10 seconds.

When the push button is released, power will be removed from all electronics and the unit will immediately cease transmission. FCC Rules 15.231 (a)(1) allows no longer than 5 seconds upon the release of a manually activated transmitter.

Signed:

A handwritten signature in black ink that reads "John W. Kuivinen P.E." The signature is fluid and cursive, with the first name "John" being the most prominent.

John W. Kuivinen, P.E.
