Dear Application Examiner:

On behalf of Intel Corporation, Northwest EMC, Inc is submitting this application for the certification of Intel Corporation's Bigtow transmitter. It operates in the 902-928 MHz band at a peak output power of 193mW. It utilizes frequency hopping spread spectrum techniques. This transmitter will be used only as a subassembly to the Intel Wireless Series Base Station (project name Bigtow).

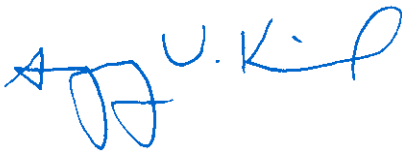

The Bigtow transmitter can be configured with only one antenna. Data is supplied with this application in support of that antenna.

The technical report and exhibits demonstrate compliance with FCC rules 47 CFR 15.247 and Public Notice DA 00-705.

To facilitate the review process, an index of exhibits has been provided (see file "Index of exhibits.pdf").

Your efforts in reviewing this application are greatly appreciated.

Best regards,
