

Date: May.29, 2026

SUBJECT: Class II Permissive Change for FCC ID: ELVATRPE

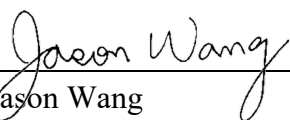

We, [NUTEK CORPORATION], hereby declare that the product models listed below are identical in design, circuitry, PCB layout, RF module, and electrical components.
The only difference between the models is the number of exterior buttons and cosmetic appearance.
These differences do not affect the RF parameters or EMC characteristics.

Model List:

- JS7J-15K601-BB
- 4361173

Additionally, the following changes are declared:

1. Add model name / HVIN: JS7J-15K601-BB and 4361173.
2. The RF chip IC has been changed from Si1080-A-GM to S1061-A-GM. The new RF chip is of the same brand, model series, and specifications as the original, and does not affect RF performance or compliance.
3. The new RF chip is pin-to-pin compatible with the original device, with identical electrical characteristics. Therefore, there is no impact on PCB layout, RF performance, or EMC compliance.
