

- **USB port**
Supports output at 200 mA @ 5 V.
- **Qi™ wireless charging area**
Wirelessly charges Qi-enabled devices.
- **Activity lights**
Alternating colors: The mouse pad is on.
- **Qi charging light**
Solid amber: The device is charging.
Slow blinking amber: The alignment between the device being charged and the charging area needs to be adjusted.
Blinking amber: A metal or magnetic object on the wireless charging area needs to be removed.

*For full functionality, connect to a 15 W USB Type-C port.

*Connect both cables to USB SuperSpeed ports to enable the adapter, supported. The logo is a registered trademark of the USB-IF.

Solid amber: The device is charging.
Slow blinking amber: The alignment between the device being charged and the charging area needs to be adjusted.
Fast blinking amber: A metal or magnetic object on the wireless charging area needs to be removed.

*For full functionality, connect to a 15 W USB Type-C port.

†Connect both cables to USB SuperSpeed ports. If you are using the adapter, the logo indicates which light is illuminated.

- ❶ **USB port**
Supports output at 200 mA @ 5 V.
- ❷ **Qi™ wireless charging area**
Wirelessly charges Qi-enabled devices.
- ❸ **Activity lights**
Alternating colors: The mouse pad is on.
- ❹ **Qi charging light**
Solid amber: The device is charging.
Slow blinking amber: The alignment between the device being charged and the charging area needs to be adjusted.
Fast blinking amber: A metal or magnetic object on the wireless charging area needs to be removed.

*For full functionality, connect to a 15 W USB Type-C port.

*Connect both cables to the USB SuperSpeed ports if you are using the adapting the logo is a registered trademark of the USB Implementers Forum.

requirements of the Canadian Interference-Causing Equipment Regulations (ICES-CIG) (316/NRB-316) which complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following conditions: (1) the device must not cause interference, and (2) the device must accept any interference, including that which may cause the operation of the device.

AVIS CANADIEN

Ce dispositif numérique de Classe B répond aux exigences de la réglementation du Canada sur les interférences électromagnétiques (ICES-CIG) (316/NRB-316). Il est conforme aux normes d'exemption de licence de l'Industrie Canada. Son utilisation est soumise aux conditions suivantes : 1) le dispositif ne doit causer d'interférence nuisible, et 2) le dispositif doit accepter toute interférence, y compris celle qui peut perturber le fonctionnement du dispositif.

Exposure Statement:
This product complies with the US/FDA RF exposure limits set forth for an uncontrolled environment and is safe for use without restrictions as described in the manual. The product must be kept at least 20cm away from the body.

AVIS CANADIEN
Ce dispositif numérique de Classe B répond aux exigences de la réglementation du Canada relative aux équipements causant des interférences CAN ICES-3(B)/NMB-3(B). Il est conforme aux normes d'exemption de licence RSS d'Industrie Canada. Son fonctionnement est assujéti aux deux conditions suivantes : 1) Ce dispositif ne doit causer aucune interférence dangereuse, et 2) ce dispositif doit accepter toute interférence reçue, y compris les interférences pouvant provoquer un fonctionnement indésirable.

Radiation Exposure Statement:
This product complies with the US/Canada RF exposure limits set forth for an uncontrolled environment and is safe for intended operation as described in this manual. The product must be kept at least 20cm away from the user's body during use.

Déclaration d'exposition aux radiations:
Le produit est conforme aux limites d'exposition pour les appareils portables RF pour les États-Unis et le Canada établies pour un environnement non contrôlé. Le produit est sûr pour un fonctionnement tel que décrit dans ce manuel. La réduction aux expositions RF peut être augmentée si l'appareil peut être conservé aussi loin que possible du corps de l'utilisateur 20cm ou que le dispositif est réglé sur la puissance de sortie la plus faible si une telle fonction est disponible. CAN ICES-3(B) / NMB-3(B)
