Declaration of Bluetooth performance

We, SDI Technologies Inc.
(Name of the manufacturer)

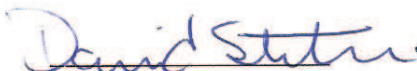

1299 Main St., Rahway, New Jersey, United States, 07065

(Address)

would like to declare the Bluetooth module performance has following features for
model IZBT10 of FCC ID: EMOIZBT10.

- The transmission of each frequency is equally on the average time.
- The input bandwidth of system receiver is matched the hopping channel bandwidths for corresponding transmitter.
- The shifted frequencies are synchronized with transmitted signal.
- The Frequency hopping spread spectrum systems could not be available to all hopping channels during each transmission.
- The design of Bluetooth frequency hopping spread spectrum system permits the system to recognize other users within the spectrum band. But it could not simultaneous occupancy of individual hopping frequencies by multiple transmissions.
