

Non-Conformity or Comment	Submitted Response	Respondent / Date of Response
For the collocation with SK9SNIC1 module, where is the RF exposure assessment showing compliance of the combination? It appears that the PCII for SNIC includes assessment for EO9ORRN, but not for EO9ORRNA which includes a slightly higher output power. Furthermore, schematics indicate a wifi connection. Has RF exposure been evaluated for collocated wifi? Or is this part not presently an option in the ORRNA?	will be with the SK9SNIC1, c2pc. a new SK9SNIC1 c2pc was sent to the their TCB this week. the WiFi is part of the SNIC1 and is being done there. In the end this grant is only for the base unit w/o the SNIC1..	JH / 17feb18
