Ref: FCC Class II Permissive change for FCC ID: **EW4DWMW095A**

Dear Examiner,

This is to request a Class II permissive change for module approval FCC ID: **EW4DWMW095A**, originally granted on **07/11/2013** respectively.

The major change filed under this application is:

1. This change is for a device previously granted under rule parts of 15.247 and is now applying for approval under 15.407(b)(4)(ii) for devices with antenna gains less than 10dBi with no changes to hardware or output power.
2. The purpose in the permissive change is to certify U-NII-1, U-NII-2A & U-NII-2C band under new U-NII rule per adopted under Docket No. 13-49.
3. The RF exposure assessment for Mobile and Portable categories under original grant is completed in an identical declared tune up power level and hence the assessment under this Class 2 permissive change application is not needed.
4. There is no any hardware change have been made to product (Schematics Diagram and Block Diagram). The frequency range remains the same and that no new channels are being added to those evaluated in the original application.

In addition. The antenna(s) type, gain, and location, and conditions remain the same as from original grant.

Sincerely,

By:
