

BASIC OPERATION

After powering up your video monitor, the parent unit streams live video in direct mode. You can also use the parent unit to control the camera's zoom, pan, tilt, and rotation. For more information, see the **Auto software** section of this manual.

Use the menu
Press **MENU** on the parent unit to enter the main menu. Choose a menu item, or press **SELECT** to return to the live video. You can also use the parent unit to control the camera's zoom, pan, tilt, and rotation. For more information, see the **Auto software** section of this manual.

Adjust speaker volume
Press **VOL** on the parent unit to adjust the speaker volume. Press **VOL** again to return to the live video. You can also use the parent unit to control the camera's zoom, pan, tilt, and rotation. For more information, see the **Auto software** section of this manual.

Turn on/off baby unit status LED
You may see the status LED indicator of your baby unit on or off. Go to the **Status LED** menu item to turn it on or off.

Turn on/off the parent unit screen
You can turn on or off the parent unit screen. Press **POWER** on the parent unit to turn it on or off. Press **POWER** again to return to the live video.

Adjust speaker volume
Press **VOL** on the parent unit to adjust the speaker volume. Press **VOL** again to return to the live video. You can also use the parent unit to control the camera's zoom, pan, tilt, and rotation. For more information, see the **Auto software** section of this manual.

TEST THE LOCATION FOR THE BABY UNIT

If you plan to install your baby unit in a designated location, use your home Wi-Fi network to test the location. You need to test the location before you install the baby unit. The baby unit will stream live video to the parent unit. You can also use the parent unit to control the camera's zoom, pan, tilt, and rotation. For more information, see the **Auto software** section of this manual.

NEED HELP?

Driven by system updates, the software, online help topics, and online FAQs will be updated periodically. For more information, see the **Auto software** section of this manual. You can also use the parent unit to control the camera's zoom, pan, tilt, and rotation. For more information, see the **Auto software** section of this manual.
