There may be a risk of explosion if a wrong type of battery is used for the parent unit. The battery cannot be subjected

1. Do not use the device in a hospital or clinic setting.
 2. Do not use the device in the presence of flammable or explosive vapors, gases, or liquids.
 3. Do not use the device on or near the patient to excise heat seal or to create a weld.
 4. Do not use the device on the patient's head or neck.
 5. Do not use the device on the patient's face.
 6. Do not use the device on the patient's chest or abdomen.
 7. Do not use the device on the patient's limbs.
 8. Do not use the device on the patient's hands or feet.
 9. Do not use the device on the patient's fingers or toes.
 10. Do not use the device on the patient's nails.
 11. Do not use the device on the patient's teeth.
 12. Do not use the device on the patient's hair.
 13. Do not use the device on the patient's skin.
 14. Do not use the device on the patient's clothing.
 15. Do not use the device on the patient's jewelry.
 16. Do not use the device on the patient's prosthetics.
 17. Do not use the device on the patient's implants.
 18. Do not use the device on the patient's catheters.
 19. Do not use the device on the patient's tubes.
 20. Do not use the device on the patient's wires.
 21. Do not use the device on the patient's leads.
 22. Do not use the device on the patient's electrodes.
 23. Do not use the device on the patient's sensors.
 24. Do not use the device on the patient's actuators.
 25. Do not use the device on the patient's relays.
 26. Do not use the device on the patient's switches.
 27. Do not use the device on the patient's valves.
 28. Do not use the device on the patient's pumps.
 29. Do not use the device on the patient's motors.
 30. Do not use the device on the patient's generators.
 31. Do not use the device on the patient's transformers.
 32. Do not use the device on the patient's inverters.
 33. Do not use the device on the patient's converters.
 34. Do not use the device on the patient's amplifiers.
 35. Do not use the device on the patient's controllers.
 36. Do not use the device on the patient's processors.
 37. Do not use the device on the patient's computers.
 38. Do not use the device on the patient's networks.
 39. Do not use the device on the patient's servers.
 40. Do not use the device on the patient's databases.
 41. Do not use the device on the patient's applications.
 42. Do not use the device on the patient's services.
 43. Do not use the device on the patient's protocols.
 44. Do not use the device on the patient's standards.
 45. Do not use the device on the patient's specifications.
 46. Do not use the device on the patient's requirements.
 47. Do not use the device on the patient's constraints.
 48. Do not use the device on the patient's limitations.
 49. Do not use the device on the patient's capabilities.
 50. Do not use the device on the patient's strengths.
 51. Do not use the device on the patient's weaknesses.
 52. Do not use the device on the patient's opportunities.
 53. Do not use the device on the patient's threats.
 54. Do not use the device on the patient's risks.
 55. Do not use the device on the patient's uncertainties.
 56. Do not use the device on the patient's ambiguities.

 98. Do not use the device on the patient's ambiguities.
 99. Do not use the device on the patient's complexities.
 100. Do not use the device on the patient's uncertainties.

1 **CONNECT THE BABY MONITOR**

- NOTES**
- The rechargeable battery in the parent unit is built-in.
 - Use only the power adapters supplied with this product.
 - Do not connect the power cord to any wall outlet or to any other AC or controlled electric outlets.
 - Connect the power adapter in a wall or floor mount connection box.
 - Connect the power cord to the power adapter and the power unit and the baby unit, do not connect them to any other power source. Otherwise, the displays may not properly connect to the safe.
 - Make sure the parent unit, its baby unit and the power adapter are placed in the same room.
 - To maintain compliance with the FCC's RF exposure guidelines, place the baby unit at least 20 cm from people's bodies.
- Raise the parent unit antenna for better reception**
-

WHAT'S IN THE BOX

1 CONNECT THE BABY MONITOR (CONT'D)

Charge the parent unit battery before use.

- When you have connected and turned on the parent unit, the battery will be charged automatically.
- NOTES**
- Always use the battery monitor for the first time, charge the parent unit battery for 24 hours. When the battery is fully charged, the battery icon on the screen will turn green.
 - It takes longer to charge the battery when the temperature is low. To shorten the charging time, turn the parent unit off while charging.
- The standby time varies depending on the actual use of the battery.

BATTERY INDICATORS	BATTERY STATUS	ACTION
The screen displays  . The Light flashes.	The battery has very little power and is used for only a short time.	Charge without interruption (about 30 minutes).
The battery icon becomes solid  .	The battery is fully charged.	To keep the battery charged, connect it to AC power when not in use.

2 POWER ON OR OFF THE BABY MONITOR

- After the parent unit is fully charged, press **POWER** until the welcoming melody begins to play.
- 
- The diagram shows the parent unit, a rectangular device with a screen and a speaker grille. A circular callout points to the top of the device, showing a close-up of the power button.

3 POSITIONING THE BABY MONITOR

- NOTE**

 1. Place the parent unit away from the baby unit.
 2. Place the baby monitor at least 1 feet away from devices such as wireless routers, microwaves, and power lines.
 3. Place the parent unit away from the baby unit.

CAUTION

 1. The maximum volume of your parent unit is level 5, and the maximum volume is level 5 if you use the parent unit with the baby unit.
 2. Make sure your baby unit and parent unit are placed on a flat surface.
 3. Lower the volume of your parent unit.

4 STATUS CHECK

- Once you power on both your baby unit and parent unit, your parent unit displays image from the baby unit, and the **LINK** LED light turns on.
- The green LED light of the baby unit turns on.
- 
- The diagram illustrates the connection between the parent unit and the baby unit. The parent unit, a handheld device, shows a live video feed of a baby's face on its screen. A speech bubble points to a green LED light on the parent unit labeled 'LINK'. The baby unit, a small device with a camera, has a green LED light on its front that is also shown to be illuminated. A line connects the camera of the baby unit to the screen of the parent unit, representing the video transmission.

OVERVIEW - PARENT UNIT

Turn on/off the parent unit screen

- Press **POWER** on the parent unit to turn off the screen.
- Press any **keys** on the parent unit to turn on the screen again.

SOUND DETECTION AND AUTO WAKE UP

Adjust sound detection sensitivity

You can turn on **Sound Detection** and adjust the **Sound Sensitivity** to detect sounds and turn on the parent unit while its screen is switched off or dimmed. When the baby unit detects sounds that exceed certain levels, the parent unit screen will turn on and the baby unit start transmitting the sound to the parent unit, and you can see and hear your baby.

If you have turned on **Sound Detection Alert**, the parent unit beeps when the baby unit detects sounds.

SOUND SENSITIVITY (LEVEL)	Level 3 (High)	Level 2 (Medium)	Level 1 (Low)
DESCRIPTION	The parent unit screen and speaker turn on for any sound detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.	The parent unit screen and speaker turn on for any sound detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.	The parent unit screen and speaker turn on for any sound detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.

Sound activated screen and audio - Auto Wake Up

When **Auto Wake Up** is turned on, the parent unit will automatically wake up and save power when the baby unit is asleep. When the baby unit is asleep, the parent unit screen and speaker will turn on for any sound detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.

On the parent unit, the sound level is indicated by the sound level icon. The sound level icon is located on the parent unit screen and speaker. The sound level icon is located on the parent unit screen and speaker.

NOTES

- When the parent unit is in sleep mode, the parent unit screen and speaker will turn on for any sound detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.
- When the parent unit is in sleep mode, the parent unit screen and speaker will turn on for any sound detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.
- When the parent unit is in sleep mode, the parent unit screen and speaker will turn on for any sound detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.

MOTION DETECTION

Adjust motion detection sensitivity

You can turn on **Motion Alert** and adjust the **Motion Sensitivity** to detect motion and turn on the parent unit while its screen is switched off or dimmed. When the baby unit detects motions that exceed certain levels, the parent unit screen will turn on and the baby unit start transmitting the sound to the parent unit, and you can see and hear your baby.

If you have turned on **Motion Alert**, the parent unit beeps when the baby unit detects motions.

MOTION SENSITIVITY (LEVEL)	Level 3 (High)	Level 2 (Medium)	Level 1 (Low)
DESCRIPTION	The parent unit screen and speaker turn on for any motion detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.	The parent unit screen and speaker turn on for any motion detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.	The parent unit screen and speaker turn on for any motion detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.

NIGHT VISION

The baby unit has infrared LEDs that allow you to see your baby clearly at night or in low light conditions. The parent unit screen and speaker will turn on for any motion detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.

On the parent unit, the night vision is indicated by the night vision icon. The night vision icon is located on the parent unit screen and speaker. The night vision icon is located on the parent unit screen and speaker.

NOTES

- When the parent unit is in sleep mode, the parent unit screen and speaker will turn on for any motion detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.
- When the parent unit is in sleep mode, the parent unit screen and speaker will turn on for any motion detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.
- When the parent unit is in sleep mode, the parent unit screen and speaker will turn on for any motion detected from your baby. The parent unit also transmits background noise from your baby. The parent baby makes soft sounds.

DIM MODE

The parent unit display will dim to conserve energy after 5 minutes of inactivity, in which there is neither key pressed nor alert received from the baby unit.

FOR VM919-2HD ONLY

Monitoring mode

Select **different views - Single CAM** to view the image from the baby unit.

Select **different views - Split** to view the image from the baby unit.

Parent mode as your monitoring mode

Select **Parent mode** as your monitoring mode to view the images from both baby units at once.

Split mode

Select **Split mode** as your monitoring mode to view the images from both baby units at once.

MOUNT THE BABY UNIT ON DRY WALL (OPTIONAL)

NOTES

- Check for expansion strength and baby unit's single-hole drilling holes.
- The type of screw and anchor you use depends on the composition of the wall. You may need to purchase the screws and anchors separately to mount your baby unit.

1. Place the wall mount bracket on a wall and then use a pencil to mark the top and the bottom holes as shown in the diagram. The distance between the two holes in the wall (7.2 inch or 18.3 cm).

3. Align the wall mount bracket and screws with the holes in the wall as shown. Tighten the screws in the wall until the wall mount bracket is flush with the wall. The position is fixed. You can tighten the other screw in the top hole.

4. Place the baby unit on the wall mount bracket. Tighten the screw into the threaded socket at the bottom to secure the baby unit.

5. Hold an expanding your baby unit's leveling angle by tilting the wall mount bracket. Tilt your baby unit up or down to adjust to your preferred angle. Then, to tilt the knob in clockwise direction to tighten the joint and secure the angle.

FREQUENTLY ASKED QUESTIONS

Why doesn't the parent unit turn on when the baby unit is in sleep mode?

The parent unit will turn on when the baby unit is in sleep mode. The parent unit will turn on when the baby unit is in sleep mode. The parent unit will turn on when the baby unit is in sleep mode.

Why doesn't the parent unit turn on when the baby unit is in sleep mode?
