

Congratulations
on purchasing your new VTech product.
Before using this baby monitor, please read the **Important safety instructions**

Vtech 5" Smart Wi-Fi 1080p Video Monitor allows you to stay close to your baby when you are on the move or away. This monitor is Wi-Fi enabled, using your home wireless network to stream live video and audio through the 1080p baby unit and 5-inch colour screen parent unit. It allows you to maintain a constant connection to your baby.

You can also monitor from your smartphone or mobile tablet.

Vtech 5" Smart Wi-Fi 1080p Video Monitor uses **MyVtech Baby Pro** app to let you instantly see and hear what's happening with your baby from anywhere in the world. The app can be downloaded from the App Store or the Google Play™ Store.

applied narephelene is located at the bottom of the battery unit.

When using your equipment, basic safety precautions should be followed. Read and understand the following instructions and risk of fire, electric shock and injury, including the following:

- Do not use the product if the battery is damaged or the capacity is reduced.

- [illegible]

Your baby monitor package contains the following items. Save your sales receipt and original packaging in the event warranty service is necessary.

Network	Wi-Fi
Wi-Fi router	2.4GHz 802.11 b/g/n
Internet connection	1.5 Mbps @ 720p or 2.5 Mbps @1080p upload bandwidth per baby unit

1 Download the free **MyVtech Baby Pro** mobile app and install it to a mobile device, then use your mobile device and the mobile app to monitor your baby remotely.

1. Press **MENU/SELECT** when the parent unit is idle.

2. Go to  **Connect Mobile Phone.**
3. Scan the QR code in the parent unit to download the app into your mobile device if you have not installed the app yet.
4. Follow the instructions in the mobile app to set up and pair your baby unit to the mobile app.

Alternatively, you can download the mobile app from the App Store or Google Play store.

1. Browse the App Store or the Google Play store .
2. Search for the mobile app with the keyword "myvtech baby pro".
3. Download and install the **MyVTech Baby Pro** mobile app to your mobile device.

OR

Scan the QR codes on the right to get the app.

 NOTE

- Make sure your mobile device meets the minimum requirement for the mobile app.

- Android™ 6.0 or later; and
- iOS 12 or later

After installing the mobile app, follow the instructions in the mobile app and parent unit to set up and pair your baby unit.

- In your mobile device:**
1. Tap  to run the mobile app in your mobile device, and then create a user account.
 2. We recommend that you use common webmail services, such as Google Gmail for registration of your user account. Check your email (and Spam folder), and activate your new camera account via the email link, then sign in to your account.
 3. Follow the instructions in the mobile app to pair the camera. Tap , then **Add Camera** in the mobile app to get started.

What comes across your privacy and peace of mind. That's why we've put together a list of industry-recognized best practices to help keep your wireless connection private and your devices protected when online. We recommend you carefully review and consider complying with the following tips. Ensure your wireless connection is secure.

- Before installing a device, ensure your router's wireless signal is encrypted by selecting the "WPA2-PSK with AES" setting in your router's wireless security menu.
- Change default settings.
- Change your wireless router's default wireless network name (SSID) to something unique.
- Change default passwords to unique, strong passwords. A strong password:
 - Is at least 12 characters long
 - Is complex.
- Does not contain dictionary words or personal information.

Contains a mix of uppercase letters, lowercase letters, special characters and numbers.

- Keep your device up to date:
 - Download security patches from manufacturers as soon as they become available. This will ensure you always have the latest security updates.
 - If the feature is available, enable automatic updates for your phone.
- Disable Unused Plug and Play (P2P) on your future releases.
 - P2P-enabled devices on a router can act as a gateway for your firewall by allowing other network devices to open inbound ports without any intervention or approval from you. A virus or other malware program could use this function to compromise security for the entire network.

Connect the baby monitor

NOTES

- The rechargeable battery in the parent unit is built-in.
- Use only the power adapters supplied with this product.
- Make sure the parent unit and the baby unit are not connected to the switch controlled electric outlet.
- Connect the power adapters in a vertical or floor mount position only. The adapter prongs are not designed to hold the weight of the parent unit and the baby unit, so do not connect them to any cable under the table, or cabinet outlet. Otherwise, the adapter may not properly connect to the outlets.
- Make sure the parent unit, the baby unit and the power adapter cords are out of reach of children.

Charge the parent unit battery before use

The parent unit runs on rechargeable battery or AC power. To continuously monitor your baby, keep the parent unit connected to AC power.

- Before using the baby monitor for the first time, charge the parent unit battery for 12 hours. When the parent unit battery is fully charged, the battery icon becomes solid .
- The standby time varies depending on your actual use.

After the parent unit is fully charged, press **Power** until the welcome screen appears.

The battery icon indicates the battery status (see the following table)

BATTERY INDICATORS	BATTERY STATUS	ACTION
The screen displays  and The  LED light flashes.	The battery has very little charge and may be used for only a short time.	Charge without interruption (about 30 minutes).
The battery icon becomes solid 	The battery is fully charged.	To keep the battery charged, connect it to AC

Raise the parent unit

Baby unit overview

A diagram of a cell with a label 'C' pointing to the nucleus.

The diagram shows two views of the mobile phone. The front view on the left has callouts 1 through 10 pointing to various features: 1 points to the earpiece, 2 to the top camera, 3 to the screen, 4 to the navigation pad, 5 to the call key, 6 to the power key, 7 to the volume keys, 8 to the external display, 9 to the bottom camera, and 10 to the bottom speaker. The back view on the right has callouts 11 through 14: 11 points to the antenna, 12 to the camera lens, 13 to the battery cover latch, and 14 to the bottom speaker.

To ensure that your baby monitor is always at its best performance, the parent unit will prompt you to update its software and the baby unit firmware when there are new versions available.

- Follow the instructions on the parent unit screen to update your baby monitor. If you skip the updates, the parent unit and baby unit will be updated automatically when the parent unit is powered off, and then powered on again.
- To check if your device is running on the latest software or to update your device software, go to [Settings](#).

- You must connect your video monitor to your secured home Wi-Fi network in order to receive the latest software and firmware updates. To set it up, go to:

- 
- > Configure Wi-Fi

You can control the night light remotely.

1. Press **MENU**.
2. Press **◀▶** to scroll to  **Night Light** menu, then press **MENU** or **▼** to enter.
3. Press **◀▶** to choose below options.

the parent unit or directly on the baby unit.

 Night Light Control Key

Single Tap: Turn on/off

Tap and hold: Adjust night light brightness
