TECHNICAL SPECIFICATIONS

Baby with: 2412 + 2462 MHLA

Frequency

The applied nappeline is located at the bottom of the baby unit's base.

When using your equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury. Follow the following:

1. Follow all warnings and instructions marked on the product.
2. Adult setup is required.
3. **CAUTION:** Do not install the baby unit at a height above 5.5 feet (2 meters).
4. This product is intended as an aid. It is not a substitute for responsible and proper adult supervision and should not be used as such.
5. This product is not intended for use as a medical monitor.
6. Do not use this product near water. For example, do not use it next to a bath tub, wash bowl, kitchen sink, laundry tub, etc.

7. CAUTION Use only the battery type and model specified. There may be a risk of explosion if an incorrect battery type is used for the product. The battery cannot be subjected to high or low external temperature and low air pressure at high altitude during use, storage or transportation. Dropping of battery into fire or a hot oven, or mechanically crushing or cutting of the battery can cause an explosion or fire. The battery should not be used in high temperature surrounding environment can result in an explosion or the leakage of flammable liquid of gas. Battery subjected to extremely low air pressure may result in an explosion or the leakage of flammable liquid of gas. For more information on the battery, please refer to the information in the RBBRC section.

8. Use only the adapters included with this product. Incorrect adapter polarity or voltage can seriously damage the product.

  Power adapters information:
Baby Unit Output: 5V DC 3000mA
Vtech Telecommunications Ltd.
Model: VT05UEU05100
Parent Unit Output: 5V DC 2A
Vtech Telecommunications Ltd.
Model: VT07UEU05200

  Rechargeable battery information:
3.7V 5000mAh, 18.5Wh Lithium-ion battery
Zhuhai Oral Power Energy Co., Ltd.
Model: OS5P6090-5A8-1.3V-251P

9. The power adapter is intended to be correctly oriented in a vertical or horizontal position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under the table or cabinet outlet.

10. For pluggable equipment, the socket-outlet (power adapter) shall be installed near the equipment and shall be easily

Unplug this product from the wall outlet before cleaning.
Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Do not touch the power adjustment to replace them with other plugs, as this causes a hazardous situation.

Do not allow anything to rest on the power cord. Do not install product in areas where the power cord may be walked on or crimped.

This product should be operated only from the type of power supply that is marked on the label. If you are not sure of the type of power supply in your home, consult your dealer or local power company.

The equipment is to be supplied from an identified USB port complying with the requirements of Limited Power Source.

Do not overfeed wall outlets or use an extension cord.

Do not use this product on an unstable table, shelf, stand or other unstable surface.

This product should not be placed in any area where vibration, such as from a washing machine, is likely to occur. If placed at the bottom of this product are provided for ventilation. To protect the product from overheating, there should be adequate clearance by placing the product on a soft surface such as a bed, sofa or rug. This product should never be placed near or over a fire.

Direct mode

The parent unit and the baby unit of your video system are designed to work together by default, which allows you to stream live video from the parent unit to the baby unit. This lets you stream live video from parent unit on.

Tip

- You may experience reduced signal strength if there are any obstructing factors, such as internal walls, between the parent unit and the baby unit. To improve the signal strength,

Wi-Fi Router mode

To stream live video with better connection, you can also set up your monitor in **Router mode** connection.

Router mode uses your home Wi-Fi network to connect the video monitor. It supports streaming live video through the parent unit and **MyVTEch Baby Pro** app.

Download and install the **MyVTEch Baby Pro** mobile app to stream remotely. With the mobile app, your Wi-Fi router (not included) serves as a communicating channel between your baby unit and mobile device, allowing you to monitor and control your baby unit wherever you are. For details, see **Download app for mobile**.

Auto mode

With **Auto mode** connection, the parent unit connection mode (**Direct** or **Wi-Fi**) when cannot be interrupted in **Auto mode**.

NOTES

- When both parent unit and app are viewing the content, the app is optimised to deliver the best possible viewing experience.

Your baby monitor package contains the following items. Save your sales receipt and original packaging in the event warranty service is necessary.

Requirements	
For mobile access:	
MyVtech Baby Pro mobile app	
Network	Wi-Fi
Wi-Fi router	2.4GHz 802.11 b/g/n
Internet connection	1.5 Mbps @ 720p or 2.5 Mbps @ 1080p upload bandwidth per baby unit

It's not about your privacy and peace of mind. That's why we're not just together, it's also why we recommend best practices to help keep your wireless connection private and your devices protected from malware. We recommend you carefully review and customize everything with the following link:

[How your phone connects to the Internet](#)

Before installing a device, make sure your router's wireless setup is configured to the "WPA2 PSK with AES" configuration.

Change default settings.

- Change your wireless default wireless network name (SSID) to something unique.
- Change default passwords to unique, strong passwords. A strong password:
 - Is at least 12 characters long.
 - Is complex.
 - Is not a common dictionary word or phrase, personal information, special characters and numbers.

Contains a mix of uppercase letters, lowercase letters, special characters and numbers.

Keep your devices up to date.

- Download security updates from manufacturers as soon as they become available. This is true when you always have an Internet connection.
- If hardware is available, enable automatic updates for future releases.
- Enable Internet Protection and Play Protect on your Android phone.
- Use Android on a computer to run the anti-malware of your firewall to allow other wireless devices to open without your phone's Internet connection or approval from you. A device without your permission could cause it to function as a computer for the entire network.

4. Wi-Fi Alliance: Discover Wi-Fi Security – <http://www.wi-fi.org/en/about-wi-fi-security>

1. Download the free **MyTech Baby Pro** mobile app and install it to a mobile device, then use your mobile device and the mobile app to monitor your areas remotely.
 1. Press **MENU** when the parent unit is idle.
 2. Go to **> Connect Mobile Phone.**
 3. Scan the QR code in the parent unit to download the app into your mobile device.
 4. Follow the instructions in the mobile app to set up and pair your baby unit to the mobile app.

Alternatively, you can download the mobile app from the App Store or Google Play store.

Install MyVTech Baby Pro mobile app

1. Browse the App Store or the Google Play store .
2. Search for the mobile app with the keyword "myvtech baby pro".
3. Download and install the **MyVTech Baby Pro** mobile app to your mobile device.

OR

Scan the QR codes on the right to get the app.

NOTE

- Make sure your mobile device meets the minimum requirement for the mobile app.

Minimum requirement

The mobile app is compatible with:

- Android™ 6.0 or later; and
- iOS 12 or later.

- 2 After installing the mobile app, follow the instructions in the mobile app and parent unit to set up and pair your baby unit.

In your mobile device:

1. Tap  to run the mobile app in your mobile device, and then create a user account.
2. We recommend that you use common web/mail services, such as Google Gmail for registration of your user account. Check your email (and Spam folder), and activate your new camera account via the email link, then sign in to your account.
3. Follow the instructions in the mobile app to pair the camera. Tap  then **Add Camera** in the mobile app to get started.

Connect the baby monitor

NOTES

- The rechargeable battery in the parent unit is built-in.
- Use only the power adapters supplied with this product.
- Make sure the parent unit and the baby unit are not connected to the switch controlled electric outlets.
- Connect the power adapters in a vertical or floor mount position only. The adapters' prongs are not designed to hold the weight of the parent unit and the baby unit, so do not connect them to any ceiling under the table, or cabinet outlets. Otherwise, the adapters may not properly connect to the outlets.

NOTES

- When powering up, the baby unit's status LED turns on. It will turn off after a while and keeps off.
- The status LED is set to off by default.

 NOTE:

BASIC OPERATION

After powering up your video monitor, the parent unit streams live video in direct mode. We recommend you follow the instructions on screen to set up home Wi-Fi network with your monitor for functionality enhancements and mobile access. See **Auto software and firmware update and Download app for mobile access** in this quick start guide.

Use the Control Panel
Tap the screen to open and use the Control Panel.
Tap to lock the panel, and tap to unlock it.

Press MENU on the parent unit to enter the main menu, choose a menu item, or save a setting. You can use the parent unit menu for advanced settings or operations, such as to play or stop the baby unit lullaby, or adjust the baby unit sound sensitivity.

While in the menu:

- Press or to scroll among the menu options.
- Press **TALK** to select an item.
- Press **TALK** to return to the live video.
- Press to go to the **Help & Info** page.

Adjust speaker volume
Press VOL +/- VOL +/- to adjust the parent unit speaker volume level received from the baby unit.

Zoom
Press to zoom in or out in a fixed zoom sequence. indicates that the image is magnified 3 times.

Tip
You can reset the parent unit by pressing the **RESET** key at the back of the unit.
Insert a pin into the **RESET** hole on the back of the parent unit, and then press the key inside.

Talk to your baby via the baby unit

1. Press and hold the **TALK** key.
2. When the icon displays on screen, speak to your parent unit. Your voice is transmitted to the baby unit.
3. When finished talking, release the **TALK** key to hear your baby again.

Turn on/off the parent unit screen

- You can turn on or turn off the parent unit screen without powering off the unit. You will still hear sounds from the baby unit.
- Press on the parent unit to turn off the screen.
- Press any key on the parent unit turn the screen on again.

NIGHT LIGHT

You can control the night light remotely on the parent unit or directly on the baby unit.

On the parent unit:

1. Press **MENU**.
2. Press to scroll to **Night Light** menu, then press **MENU** or to enter.
3. Press or to choose below options:
 - Turn on/off night light
 - Change night light color
 - Adjust night light brightness
 - Set night light timer

On the baby unit:

- Night Light Control Key**
Single Tap: Turn on/off
Tap and hold: Adjust night light brightness

For RM7868-2HD ONLY

Monitoring Modes

When more than one baby unit is paired to the parent unit, you can choose to view different baby units in three monitoring modes. Learn more about each below:

- | Mode | Description |
|--------------------|--|
| Single Mode | The screen displays images only from the selected baby unit in full screen. |
| Split Mode | The screen displays images from all paired baby units at the same time in split view. |
| Patrol Mode | The screen displays a single camera view that transitions to a different baby unit every 10 seconds. |

Change the monitoring mode:

1. Press **MENU** when the parent unit is idle.
2. Press **MENU** or to enter **Monitoring Mode** menu.
3. Press to choose between **Single**, **Split**, and **Patrol** monitoring mode options. Press **SELECT** to confirm.

TEST THE SOUND LEVEL AND POSITION THE BABY MONITOR

Testing the sound level of the baby monitor

- NOTE**
- This baby monitor is intended as an aid. It is not a substitute for proper adult supervision, and should not be used as such.

CAUTION

- For hearing protection, make sure the parent unit is more than 3 feet away from the baby unit. If you hear any high-pitched noise from the parent unit, move the parent unit further until the noise stops. You can also press **VOL +/-** on the parent unit to lower or raise the noise.

TIP

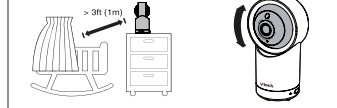

- Increase the parent unit speaker volume if you cannot hear the sounds transmitted from the baby unit.

Positioning the baby monitor

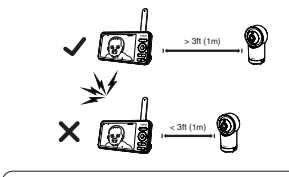

- CAUTION**
- Place the baby unit out of the reach of your baby. Never place or mount the baby unit inside the baby's cot or playpen.

1. Place the baby unit more than 3 feet away from your baby.
2. Adjust the angle of the baby unit to aim at your baby.

3. To avoid causing high-pitched screaming noise from your baby monitor:

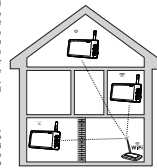

- Make sure your baby unit and parent unit are more than 3 feet apart; OR
- Turn down the volume of your parent unit.

TEST THE LOCATION FOR THE BABY UNIT

If you plan to install your baby unit in a designated location, and use your home Wi-Fi network to connect your video monitor, you need to test which of your selected monitoring areas within the house have good Wi-Fi signal strength. After you have powered on your parent unit, you can use parent unit Wi-Fi signal strength indicator to assist in checking. Once you have identified the suitable location, you can install your baby unit. Adjust the distance between your baby unit and the Wi-Fi router if needed.

- TIP**
- Depending on surroundings and obstructing factors, such as the effect distance and internal walls have on signal strength, you may experience reduced Wi-Fi signal. To improve the Wi-Fi signal strength, adjust the direction or direction of your parent unit. Check with your parent unit again.

AUTO SOFTWARE AND FIRMWARE UPDATE

To ensure that your baby monitor is always at its best performance, the parent unit will prompt you to update its software and the baby unit firmware when there are new versions available.

- Follow the instructions on the parent unit screen to update your baby monitor. If you skip the updates, the parent unit and baby unit will be updated automatically when the parent unit is powered off, and then powered on again.

- To check if your device is running on the latest software or to update your device software, go to:

Connect Mobile Phone

Connect your baby monitor to Wi-Fi

- You must connect your video monitor to your secured home Wi-Fi network in order to receive the latest software and firmware updates. To set it up, go to:

NEED HELP?

For instructions and guides to make the best use of your baby monitor, and for the latest information and support, check out our online help topics and FAQ. The online help page will also be updated periodically to reflect product system updates.

Use your smartphone or mobile device to access our online help.

- Go to <https://help.vtechphones.com/RM7868HD> or <https://help.vtechphones.com/RM7868-2HD> OR

- Scan the QR code on the right. Launch the camera app or QR code scanner app on your smartphone or tablet. Hold the device's camera up to the QR code and frame it. Tap the notification to be redirected to the online help page.

If the QR code is not clearly displayed, adjust your camera's focus by moving your device closer or further away until the image is clear.

If you would like to contact us, visit:

<https://help.vtechphones.com/cs>

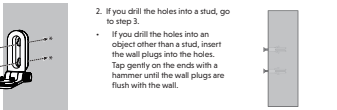

You can also call our Customer Support at 1-844-848-8324 (1-844-84-VTECH) [in US] or 1-888-311-2025 [in Canada] for help.

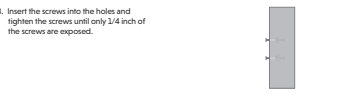

MOUNT THE BABY UNIT (OPTIONAL)

- NOTES**
- Check for obstructions and camera angle of the baby unit before drilling the holes.
 - The types of screws and plugs you need depend on the composition of the wall. You may need to purchase the screws and plugs separately to mount your baby units.

1. Place the wall mount bracket on a wall and then use a pencil to mark two holes in parallel. Remove the wall mount bracket and drill two holes in the wall (1/2 inch in dia).

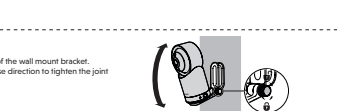

3. Align the wall mount bracket and screws with the holes in the wall as shown. Tighten the screw in the middle hole first, so that the wall mount bracket position is fixed. You can tighten the other screw in the top hole.

4. Place the baby unit on the wall mount bracket, and then slide it forward until it locks into place. Connect the power adapter to the baby unit and a power supply not controlled by a wall switch.

5. You can maximize your baby unit's viewing angles by tilting the wall mount bracket. Hold the baby unit, and then rotate the knob in anticlockwise direction. This will loosen the joint of the wall mount bracket. Tilt your baby unit up or down to your preferred angle. Then, rotate the knob in clockwise direction to tighten the joint and secure the angle.

GENERAL PRODUCT CARE

- To keep this product working well and looking good, follow these guidelines:
- Avoid placing it near heating appliances and devices that generate electrical noise (for example, motors or fluorescent lamps).
 - DO NOT expose it to direct sunlight or moisture.
 - Avoid dropping the product or treating it roughly.
 - Clean with a soft damp cloth.
 - DO NOT immerse the parent unit and the baby unit in water and do not clean them under the tap.
 - DO NOT use cleaning spray or liquid cleaners.
 - Make sure the parent unit and the baby unit are dry before you connect them to the mains again.
 - Clean the USB charging port of dust, dirt, and lint regularly.

STORAGE

When you are not going to use the video monitor for some time, store the parent unit, the baby unit and the adapters in a cool and dry place.

FREQUENTLY ASKED QUESTIONS

Below are the questions most frequently asked about the video monitor.

- Can I turn the parent unit display screen off but keep hearing sounds from the baby unit?
- Yes, press on the parent unit to turn off the screen. The parent unit display will also dim automatically after being inactive for some time. In both instances, you will still be able to hear all sounds from the baby unit.
- Press any key on the parent unit to turn the screen back on.

Why is the baby unit not responding normally?

Try the following (in the order listed) for a common cure:

1. Disconnect the power to the baby unit.
2. Wait a few minutes before connecting power back to the baby unit.
3. Reboot the parent unit.

Why is my screen in black and white?

The baby unit has a light sensor that measures ambient light. When the ambient light is dim, such as during night time or in a dark room, the baby unit activates its infrared LEDs, and displays the camera images in black and white night vision.

Why does my baby unit show off-line? Why is the connection lost every now and then?

The baby unit may have lost connection to the Wi-Fi router. Check your network and router settings.

Other electronic products may cause interference with your baby unit. Try installing your baby unit far away from these electronic devices as possible.

Why can't I hear a sound? Why can't I hear my baby cry?

The parent unit speaker volume may be too low. Press **VOL +/-** on the parent unit to increase the volume.

You may have set a low sound sensitivity level. Set the sound sensitivity to a higher level. For details, go to www.vtechphones.com for online help topics.

THE RBRC SEAL

The RBRC seal on the lithium-ion battery indicates that Baby Communications, Inc. is voluntarily participating in an industry self-initiated safety program. This program is designed to ensure that all lithium-ion batteries used in the United States and Canada. The program provides a convenient alternative to placing used lithium-ion batteries into the trash or recycling bins, which may be illegal in your area.

VTECH's participation makes it easy for you to drop off your spent product of old reusable participating in the program for recycling or safe disposal. For more information, visit www.vtechphones.com/rbrc or contact your local recycling center. Please call 1-800-848-8324 for information on lithium-ion battery recycling and disposal bans/restrictions in your area. VTECH's involvement in this program is part of its commitment to protecting our environment and conserving natural resources.

THE RBRC Seal and 1 (800) 848-8324 ARE REGISTERED TRADEMARKS OF CALTECH, INC.

FCC AND IC REGULATIONS

FCC Part 15

NOTICE: This device has been tested and found to comply with the requirements for a Class B digital device under Part 15 of the Federal Communications Commission (FCC) rules. These requirements are intended to provide reasonable protection against harmful interference to other licensed radio communications. This device may cause interference to other licensed radio communications. If you experience interference, you should take the following steps: (1) Change the orientation of the device. (2) Increase the distance between the device and the source of interference. (3) Use a different power outlet. (4) Use a different power cord. (5) Use a different antenna. (6) Use a different cable. (103) Use a different frequency band. (104) Use a different channel band. (105) Use a different mode band. (106) Use a different power level band. (107) Use a different antenna type band. (108) Use a different cable type band. (109) Use a different frequency band. (110) Use a different channel band. (111) Use a different mode band. (112) Use a different power level band. (113) Use a different antenna type band. (114) Use a different cable type band. (115) Use a different frequency band. (116) Use a different channel band. (117) Use a different mode band. (118) Use a different power level band. (119) Use a different antenna type band. (120) Use a different cable type band. (121) Use a different frequency band. (122) Use a different channel band. (123) Use a different mode band. (124) Use a different power level band. (125) Use a different antenna type band. (126) Use a different cable type band. (127) Use a different frequency band. (128) Use a different channel band. (129) Use a different mode band. (130) Use a different power level band. (131) Use a different antenna type band. (132) Use a different cable type band. (133) Use a different frequency band. (134) Use a different channel band. (135) Use a different mode band. (136) Use a different power level band. (137) Use a different antenna type band. (138) Use a different cable type band. (139) Use a different frequency band. (140) Use a different channel band. (141) Use a different mode band. (142) Use a different power level band. (143) Use a different antenna type band. (144) Use a different cable type band. (145) Use a different frequency band. (146) Use a different channel band. (147) Use a different mode band. (148) Use a different power level band. (149) Use a different antenna type band. (150) Use a different cable type band. (151) Use a different frequency band. (152) Use a different channel band. (153) Use a different mode band. (154) Use a different power level band. (155) Use a different antenna type band. (156) Use a different cable type band. (157) Use a different frequency band. (158) Use a different channel band. (159) Use a different mode band. (160) Use a different power level band. (161) Use a different antenna type band. (162) Use a different cable type band. (163) Use a different frequency band. (164) Use a different channel band. (165) Use a different mode band. (166) Use a different power level band. (167) Use a different antenna type band. (168) Use a different cable type band. (169) Use a different frequency band. (170) Use a different channel band. (171) Use a different mode band. (172) Use a different power level band. (173) Use a different antenna type band. (174) Use a different cable type band. (175) Use a different frequency band. (176) Use a different channel band. (177) Use a different mode band. (178) Use a different power level band. (179) Use a different antenna type band. (180) Use a different cable type band. (181) Use a different frequency band. (182) Use a different channel band. (183) Use a different mode band. (184) Use a different power level band. (185) Use a different antenna type band. (186) Use a different cable type band. (187) Use a different frequency band. (188) Use a different channel band. (189) Use a different mode band. (190) Use a different power level band. (191) Use a different antenna type band. (192) Use a different cable type band. (193) Use a different frequency band. (194) Use a different channel band. (195) Use a different mode band. (196) Use a different power level band. (197) Use a different antenna type band. (198) Use a different cable type band. (199) Use a different frequency band. (200) Use a different channel band. (201) Use a different mode band. (202) Use a different power level band. (203) Use a different antenna type band. (204) Use a different cable type band. (205) Use a different frequency band. (206) Use a different channel band. (207) Use a different mode band. (208) Use a different power level band. (209) Use a different antenna type band. (210) Use a different cable type band. (211) Use a different frequency band. (212) Use a different channel band. (213) Use a different mode band. (214) Use a different power level band. (215) Use a different antenna type band. (216) Use a different cable type band. (217) Use a different frequency band. (218) Use a different channel band. (219) Use a different mode band. (220) Use a different power level band. (221) Use a different antenna type band. (222) Use a different cable type band. (223) Use a different frequency band. (224) Use a different channel band. (225) Use a different mode band. (226) Use a different power level band. (227) Use a different antenna type band. (228) Use a different cable type band. (229) Use a different frequency band. (230) Use a different channel band. (231) Use a different mode band. (232) Use a different power level band. (233) Use a different antenna type band. (234) Use a different cable type band. (235) Use a different frequency band. (236) Use a different channel band. (237) Use a different mode band. (238) Use a different power level band. (239) Use a different antenna type band. (240) Use a different cable type band. (241) Use a different frequency band. (242) Use a different channel band. (243) Use a different mode band. (244) Use a different power level band. (245) Use a different antenna type band. (246) Use a different cable type band. (247) Use a different frequency band. (248) Use a different channel band. (249) Use a different mode band. (250) Use a different power level band. (251) Use a different antenna type band. (252) Use a different cable type band. (253) Use a different frequency band. (254) Use a different channel band. (255) Use a different mode band. (256) Use a different power level band. (257) Use a different antenna type band. (258) Use a different cable type band. (259) Use a different frequency band. (260) Use a different channel band. (261) Use a different mode band. (262) Use a different power level band. (263) Use a different antenna type band. (264) Use a different cable type band. (265) Use a different frequency band. (266) Use a different channel band. (267) Use a different mode band. (268) Use a different power level band. (269) Use a different antenna type band. (270) Use a different cable type band. (271) Use a different frequency band. (272) Use a different channel band. (273) Use a different mode band. (274) Use a different power level band. (275) Use a different antenna type band. (276) Use a different cable type band. (277) Use a different frequency band. (278) Use a different channel band. (279) Use a different mode band. (280) Use a different power level band. (281) Use a different antenna type band. (282) Use a different cable type band. (283) Use a different frequency band. (284) Use a different channel band. (285) Use a different mode band. (286) Use a different power level band. (287) Use a different antenna type band. (288) Use a different cable type band. (289) Use a different frequency band. (290) Use a different channel band. (291) Use a different mode band. (292) Use a different power level band. (293) Use a different antenna type band. (294) Use a different cable type band. (295) Use a different frequency band. (296) Use a different channel band. (297) Use a different mode band. (298) Use a different power level band. (299) Use a different antenna type band. (300) Use a different cable type band. (301) Use a different frequency band. (302) Use a different channel band. (303) Use a different mode band. (304) Use a different power level band. (305) Use a different antenna type band. (306) Use a different cable type band. (307) Use a different frequency band. (308) Use a different channel band. (309) Use a different mode band. (310) Use a different power level band. (311) Use a different antenna type band. (312) Use a different cable type band. (313) Use a different frequency band. (314) Use a different channel band. (315) Use a different mode band. (316) Use a different power level band. (317) Use a different antenna type band. (318) Use a different cable type band. (319) Use a different frequency band. (320) Use a different channel band. (321) Use a different mode band. (322) Use a different power level band. (323) Use a different antenna type band. (324) Use a different cable type band. (325) Use a different frequency band. (326) Use a different channel band. (327) Use a different mode band. (328) Use a different power level band. (329) Use a different antenna type band. (330) Use a different cable type band. (331) Use a different frequency band. (332) Use a different channel band. (333) Use a different mode band. (334) Use a different power level band. (335) Use a different antenna type band. (336) Use a different cable type band. (337) Use a different frequency band. (338) Use a different channel band. (339) Use a different mode band. (340) Use a different power level band. (341) Use a different antenna type band. (342) Use a different cable type band. (343) Use a different frequency band. (344) Use a different channel band. (345) Use a different mode band. (346) Use a different power level band. (347) Use a different antenna type band. (348) Use a different cable type band. (349) Use a different frequency band. (350) Use a different channel band. (351) Use a different mode band. (352) Use a different power level band. (353) Use a different antenna type band. (354) Use a different cable type band. (355) Use a different frequency band. (356) Use a different channel band. (357) Use a different mode band. (358) Use a different power level band. (359) Use a different antenna type band. (360) Use a different cable type band. (361) Use a different frequency band. (362) Use a different channel band. (363) Use a different mode band. (364) Use a different power level band. (365) Use a different antenna type band. (366) Use a different cable type band. (367) Use a different frequency band. (368) Use a different channel band. (369) Use a different mode band. (370) Use a different power level band. (371) Use a different antenna type band. (372) Use a different cable type band. (373) Use a different frequency band. (374) Use a different channel band. (375) Use a different mode band. (376) Use a different power level band. (377) Use a different antenna type band. (378) Use a different cable type band. (379) Use a different frequency band. (380) Use a different channel band. (381) Use a different mode band. (382) Use a different power level band. (383) Use a different antenna type band. (384) Use a different cable type band. (385) Use a different frequency band. (386) Use a different channel band. (387) Use a different mode band. (388) Use a different power level band. (389) Use a different antenna type band. (390) Use a different cable type band. (391) Use a different frequency band. (392) Use a different channel band. (393) Use a different mode band. (394) Use a different power level band. (395) Use a different antenna type band. (396) Use a different cable type band. (397) Use a different frequency band. (398) Use a different channel band. (399) Use a different mode band. (400) Use a different power level band. (401) Use a different antenna type band. (402) Use a different cable type band. (403) Use a different frequency band. (404) Use a different channel band. (405) Use a different mode band. (406) Use a different power level band. (407) Use a different antenna type band. (408) Use a different cable type band. (409) Use a different frequency band. (410) Use a different channel band. (411) Use a different mode band. (412) Use a different power level band. (413) Use a different antenna type band. (414) Use a different cable type band. (415) Use a different frequency band. (416) Use a different channel band. (417) Use a different mode band. (418) Use a different power level band. (419) Use a different antenna type band. (420) Use a different cable type band. (421) Use a different frequency band. (422) Use a different channel band. (423) Use a different mode band. (424) Use a different power level band. (425) Use a different antenna type band. (426) Use a different cable type band. (427) Use a different frequency band. (428) Use a different channel band. (429) Use a different mode band. (430) Use a different power level band. (431) Use a different antenna type band. (432) Use a different cable type band. (433) Use a different frequency band. (434) Use a different channel band. (435) Use a different mode band. (436) Use a different power level band. (437) Use a different antenna type band. (438) Use a different cable type band. (439) Use a different frequency band. (440) Use a different channel band. (441) Use a different mode band. (442) Use a different power level band. (443) Use a different antenna type band. (444) Use a different cable type band. (445) Use a different frequency band. (446) Use a different channel band. (447) Use a different mode band. (448) Use a different power level band. (449) Use a different antenna type band. (450) Use a different cable type band. (451) Use a different frequency band. (452) Use a different channel band. (453) Use a different mode band. (454) Use a different power level band. (455) Use a different antenna type band. (456) Use a different cable type band. (457) Use a different frequency band. (458) Use a different channel band. (459) Use a different mode band. (460) Use a different power level band. (461) Use a different antenna type band. (462) Use a different cable type band. (463) Use a different frequency band. (464) Use a different channel band. (465) Use a different mode band. (466) Use a different power level band. (467) Use a different antenna type band. (468) Use a different cable type band. (469) Use a different frequency band. (470) Use a different channel band. (471) Use a different mode band. (472) Use a different power level band. (473) Use a different antenna type band. (474) Use a different cable type band. (475) Use a different frequency band. (476) Use a different channel band. (477) Use a different mode band. (478) Use a different power level band. (479) Use a different antenna type band. (480) Use a different cable type band. (481) Use a different frequency band. (482) Use a different channel band. (483) Use a different mode band. (484) Use a different power level band. (485) Use a different antenna type band. (486) Use a different cable type band. (487) Use a different frequency band. (488) Use a different channel band. (489) Use a different mode band. (490) Use a different power level band. (491) Use a different antenna type band. (492) Use a different cable type band. (493) Use a different frequency band. (494) Use a different channel band. (495) Use a different mode band. (496) Use a different power level band. (497) Use a different antenna type band. (498) Use a different cable type band. (499) Use a different frequency band. (500) Use a different channel band. (501) Use a different mode band. (502) Use a different power level band. (503) Use a different antenna type band. (504) Use a different cable type band. (505) Use a different frequency band. (506) Use a different channel band. (507) Use a different mode band. (508) Use a different power level band. (509) Use a different antenna type band. (510) Use a different cable type band. (511) Use a different frequency band. (512) Use a different channel band. (513) Use a different mode band. (514) Use a different power level band. (515) Use a different antenna type band. (516) Use a different cable type band. (517) Use a different frequency band. (518) Use a different channel band. (519) Use a different mode band. (520) Use a different power level band. (521) Use a different antenna type band. (522) Use a different cable type band. (523) Use a different frequency band. (524) Use a different channel band. (525) Use a different mode band. (526) Use a different power level band. (527) Use a different antenna type band. (528) Use a different cable type band. (529) Use a different frequency band. (530) Use a different channel band. (531) Use a different mode band. (532) Use a different power level band. (533) Use a different antenna type band. (534) Use a different cable type band. (535) Use a different frequency band. (536) Use a different channel band. (537) Use a different mode band. (538) Use a different power level band. (539) Use a different antenna type band. (540) Use a different cable type band. (541)
