

In SINGLE-CAM mode:

- Press **VIEW** repeatedly to view images of other baby units.
- Press **PATROL** to display images from different baby units in every 7 seconds. Press again to turn off the patrolling function.

Press **SPLIT** key to enter the **SPLIT-VIEW** mode.

In SPLIT-VIEW mode:

- Press **▲** or **▼** to select a baby unit.
- Press **VIEW** key to view images from the selected baby unit temporarily in **SINGLE-CAM** mode. It returns to **SPLIT-VIEW** mode after 10 seconds.
- Press **PATROL** key to display images from different baby units in every 7 seconds.
- Press **SPLIT** key again to return to **SINGLE-CAM** mode.

NOTE
The parent unit is **not** visible in **SPLIT-VIEW** mode.

Zoom

- You can zoom in or out while viewing image from baby unit in **SINGLE-CAM** mode.
- Press **Q** to zoom in.
- Press and hold **▲** or **▼** to move the zoomed image upward, downward, leftward or rightward correspondingly.
- Press **Q** again to zoom out.

Talk

- You can use the **TALK** function of the parent unit to **compress** and hold baby in **SINGLE-CAM** mode.
- Press and hold **TALK** on the parent unit. The **TALK** light turns on.
- Press towards the microphone on the parent unit. Your voice is broadcast to the baby unit.
- Release the **TALK** key to stop the broadcast. The **TALK** light goes off.

Set alert tone

- Low battery tone**
You can set the parent unit to beep when the parent unit operates in low battery condition.
- Press **MENU** when the parent unit is not in use.

Cautions

- Use and store the product at a temperature between 32°F and 104°F.
- Do not expose the product to extreme cold, heat or direct sunlight. Do not put the product close to a heating source.
- Batteries should not be exposed to excessive heat such as bright sunlight or fire.
- Make sure the baby unit(s) and the adapter cord(s) are always out of reach of the baby, at least 3 feet away from the baby or crib, to avoid a possible strangulation hazard.
- Never place the baby unit(s) inside a baby's crib or playpen. Never cover the baby unit(s) or parent unit with anything such as a towel or a blanket.
- Other electronic products may cause interference with your baby monitor. Try installing your baby monitor as far away from these electronic devices as possible: wireless routers, radios, cellular telephones, intercoms, room monitors, televisions, personal computers, kitchen appliances and cordless telephones.

Precautions for users of implanted cardiac pacemakers

- Cardiac pacemakers (applies only to digital cordless devices).
- Wireless Technology Research, LLC (WTR), an independent research entity, led a multidisciplinary evaluation of the interference between portable wireless devices and implanted cardiac pacemakers. Supported by the U.S. Food and Drug Administration, WTR recommends to physicians that:
- Pacemaker patients**
 - Should keep wireless devices at least six inches from the chest.
 - Should **NOT** place wireless devices directly over the pacemaker, such as in a breast pocket, when it is in the chest.

WTR's evaluation did not identify any risk to bystanders with pacemakers from other persons using wireless devices.

Electromagnetic fields (EMF)
This Vtech product complies with all standards regarding electromagnetic fields (EMF). If handled properly and according to the instructions in this user's manual, the product is safe to be used based on scientific evidence available today.

The BBRC® seal

The BBRC® seal on the lithium-ion battery indicates that Vtech Communications, Inc. is voluntarily participating in an industry program to collect and recycle these batteries at the end of their useful lives, when taken out of service within the United States and Canada.

The BBRC® program provides a convenient alternative to placing used lithium-ion batteries into their trash or municipal waste, which may be illegal in your area.

- Press **▼** or **▲** to choose **ALERT TONE**, then press **SELECT**.
- Press **▼** or **▲** to choose **Low Battery Tone**, then press **SELECT**.
- Press **▼** or **▲** to choose **On or Off**, then press again to confirm your selection.

No link alert

- You can set the parent unit to beep when the link between the parent unit and the baby unit is lost.
- Press **MENU** when the parent unit is not in use.
- Press **▼** or **▲** to select a baby unit.
- Press **VIEW** key to view images from the selected baby unit temporarily in **SINGLE-CAM** mode. It returns to **SPLIT-VIEW** mode after 10 seconds.
- Press **PATROL** key to display images from different baby units in every 7 seconds.
- Press **SPLIT** key again to return to **SINGLE-CAM** mode.

NOTE
The parent unit is **not** visible in **SPLIT-VIEW** mode.

- Press **Q** to zoom in.
- Press and hold **▲** or **▼** to move the zoomed image upward, downward, leftward or rightward correspondingly.
- Press **Q** again to zoom out.

- Press **VIEW** key to view images from the selected baby unit temporarily in **SINGLE-CAM** mode. It returns to **SPLIT-VIEW** mode after 10 seconds.
- Press **PATROL** key to display images from different baby units in every 7 seconds.
- Press **SPLIT** key again to return to **SINGLE-CAM** mode.

Monitor the temperature

- To monitor the temperature of your baby's room, you can turn on the temperature alert feature on the parent unit. It beeps whenever the temperature detected by the baby unit falls out of the desired temperature range.

- Minimum temperature**
You can set the desired minimum room temperature of the room temperature alert range. The minimum temperature can be set between 52°F (11°C) and 69°F (20°C).

- Press **MENU** when the parent unit is not in use.

- Press **▼** or **▲** to choose **TEMPERATURE**, then press **SELECT**.
- Press **▼** or **▲** to choose **Minimum**, then press **SELECT**.
- Press **▼** or **▲** to choose **Alert**, then press **SELECT**.
- Press **▼** or **▲** to choose **On or Off**, then press **SELECT** to confirm your selection.

Night vision

The baby unit has infrared LEDs that allow you to see your baby clearly at night or in a dark room. When the baby unit detects low light levels, the infrared LEDs are switched on automatically.

NOTE
When the infrared LEDs are on, the image is in black and white. This is normal due to external light normally.

TIP
Depending on the sun, sounds and other interfering factors, like lights, objects, colors and backgrounds, the display resolution may vary. Adjust the baby unit's angle or place the baby unit at a higher level to prevent foggy and blurry display.

Add new baby unit (VM304)

The baby units and parent unit provided are already paired. You can add or replace any baby units to use with your baby clearly at night or in a dark room. When the baby unit detects low light levels, the infrared LEDs are switched on automatically.

NOTE
When the infrared LEDs are on, the image is in black and white. This is normal due to external light normally.

General product care

To keep this product working well and looking good, follow these guidelines:

- Avoid putting it near heating appliances and devices that generate electrical noise (for example, motors or fluorescent lamps).
- DO NOT expose it to direct sunlight or moisture.
- DO NOT drop the product or treat it roughly.
- DO NOT immerse the parent unit and the baby unit in water and do not clean them under the tap.
- DO NOT use cleaning spray or liquid cleaners.
- Make sure the baby unit and parent unit are dry before you connect them to the mains again.

Storage

When you are not going to use the baby monitor for some time, remove the rechargeable battery from the parent unit. Store the parent unit, the baby unit and the adapters in a cool and dry place.

Frequently asked questions

Below are the questions most frequently asked about the baby monitor. If you cannot find the answer to your question, visit our website at www.vtechphones.com or contact 1 (800) 555-8511 for further assistance.

Why does the baby monitor not respond normally?
Try the following (in the order listed) for common cause:

1. Disconnect the power to the baby units and the parent unit.
2. Remove the batteries in the parent unit. Then install the batteries again.
3. Wait a few minutes before connecting power back to the baby units and the parent unit.
4. Turn on the baby units and the parent unit.
5. Wait for the parent unit to synchronize with the baby units.
6. Allow up to one minute for the baby units to take place.

Why don't the power-on light of the baby unit and parent unit go on when I switch on the baby unit and parent unit?
Perhaps the rechargeable battery of the baby unit is empty and the baby unit is not connected to the mains. Insert the appliance plug into the parent unit and put the adapter in a wall socket. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

The ON/OFF light on the baby unit flashes and the parent unit displays "Y"
Press **VIEW** key to view images from the selected baby unit temporarily in **SINGLE-CAM** mode. It returns to **SPLIT-VIEW** mode after 10 seconds.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains. Then press **Q** to switch on the parent unit and to establish connection with the baby unit.

Why does the baby unit not respond normally?
